METALS EXPLORATION PLC
(the "Company")

Runruno Gold Project Update

Metals Exploration plc (AIM: MTL) today reports that the Runruno Gold project has resumed milling operations and is feeding run of mine ore into the processing plant. Test running and debugging operations as part of the commissioning and ramp-up program will now continue with immediate focus on the carbon in leach circuit, BIOX® and ASTOR (cyanide destruction) circuits.

The Company will make further announcements in due course, as appropriate.
