I. GLOSARY OF ABBREVIATIONS

APROSAIC	Association of settlers for the economic, social and cultural development of the village of Santa Cruz de la India and nearby communities
CAPS	Potable Water and Sanitation Committee.
MARENA	Ministry of the Environment and Natural Resources
MEM	Ministry of Energy and Mines
SILAIS	Local system of comprehensive health care
NGO	Non-governmental organizations
INIFOM	Nicaraguan Institute for Municipal Development
INATEC	National Technological Institute
ENATREL	National Electricity Transmission Company
UNI	University of Engineering
UNAN León	National University of León
ESIPSA	Professional internal security company S.A.
EIA	Environmental Impact Assessment
INAFOR	National Forestry Institute
DAEM	Explosives and Weapons Directorate
ENACAL	Water and Sanitation Company
COPTRAMIN	Cooperative of Production and Work of Traditional Artisanal Miners of La India Community

Condor Gold has developed an internal prevention protocol with our employees, which includes sanitary measurements within the installations and towards the surrounding communities, such as:

- Talks given and written pamphlets on sanitary measurements and COVID-19 prevention were distributed to employees.
- Avoid social gatherings as much as possible and promote social distancing in common areas.
- Use of masks for employees is obligatory in the installations and villages.
- Cleaning outside and inside of vehicles after each use.
- Alcohol spray (small) is distributed for all employees and for desk/computer cleaning.
- Benzalkonium chloride is distributed for all the employees to use in their houses to clean surfaces.
- Disinfectant booth, washing hands, shoe disinfection and thermometers are used at the entrance of the offices.
- Suppliers are met outside the office areas to reduce contact with employees.
- Guidelines for kitchen area and cleaning procedures have been modified and the use of common items has been eliminated.
- Villagers in the social programs and local schools have received talks, as well as sanitary supplies (alcohol, chlorine, etc).

As of November 2020, Condor Gold regained normal activities, all employees working full time, but with sanitary measurements and social distancing and sanitary measurements being implemented to avoid spreading of Covid-19 and ensure the safety and health of its employees and surrounding communities.

I. EXECUTIVE SUMMARY

CONDOR continues to implement its Environmental and Social Management System, which includes Environment, Community, Health and Safety and Human Resources.

In this quarter, environmental work continued to focus on the monitoring of the level of groundwater and surface water, monitoring of climatic parameters, leachate sampling for kinetic study of acid rock drainage, water management, waste management and recycling, maintenance of the nursery "Oro Verde" and maintenance of 8 reforestation areas (6 located in La India and 2 in Real de la Cruz concession). Daily 5-minute talks to environmental workers were carried out, and field staff participated in a workshop on Planting Techniques, taught by the central government through the MEFFCA. Until October the León Zoo was supported as part of the biodiversity program through MARENA.

Other activities included delivery of quarterly environmental reports to the corresponding institutions (MARENA – MEM – Mayors), the renewal of three special permits was obtained from INAFOR for the extraction of firewood for the benefit of the communities in the sectors of La India (Plant Area), Presa de Colas and Tajo Tatiana. Technical and administrative support to the mayor of Santa Rosa del Peñón was concluded within the framework of the efforts to obtain an environmental permit for the landfill site in an area donated by the company, as well as support in tree pruning and cleaning in the school and health center of the community of La India, plus support in operational activities requested by the different areas of the company (Geology, Social, Procurement, Hydrology and Administration).

In December the "Oro Verde" tree nursery contained a total of 6,687 plants, which are irrigated, fertilized and kept free of weeds and pests as part of its maintenance program. Activities in the reforestation areas included cleaning, fertilization, irrigation, and pest control. A total of 920 plants were donated under commitments made with INAFOR, 1,278 plants were transplanted, and 19 trees were replaced in the plant sector within the concession area of La India.

This report is part of Condor Gold's commitment to continuous improvement and monitoring of the implementation of its Environmental and Social Management System (ESMS) in the areas of Environment, Social and Community Relations and Human Resources, ensuring transparency with its stakeholders and relevant stakeholders.

The social area continues to work on maintaining the social license with the communities neighboring the mining project through various relationship programs and various communication actions with stakeholders.

The company's social investment has focused on social programs: Contributions and Donations, addressing issues related *inter alia* to education, health, sports, community mourning; during this period, 57 contributions were delivered to individuals and organizations. Agua Fresca program benefits 460 families from the Santa Cruz de la India village, Agua Fría village and 26 property owners. Seniors program has 85 members; APROSAIC, that works with the communities neighboring the project; Agua es Vida program, which has 135 members; Businesses program, with 52 entrepreneurs; Youth in Action program, which benefits 21 youth; and Happy Childhood, which benefits 40 children.

The company continues to support training and capacity building of its employees, providing financing and scholarships for English courses, and Masters programs.

II. INTRODUCTION

This report is part of Condor Gold's commitment to continuous improvement and monitoring of the implementation of its Environmental and Social Management System (ESMS) in the areas of Environment, Social and Community Relations and Human Resources, ensuring transparency with its shareholders and relevant stakeholders.

III. OBJECTIVE

To inform stakeholders about the implementation of the Environmental and Social Management System in the areas of Environment, Social and Community Relations, and Human Resources during the third quarter of 2022.

IV. IMPLEMENTATION OF THE ENVIRONMENTAL MANAGEMENT SYSTEM.

LA INDIA CONCESSION

a. ENVIRONMENTAL MANAGEMENT

This technical report contains the main activities carried out by both the hydrological component and the environmental area during the fourth quarter of 2022; these activities are executed according to the obligations of the company relating to the environmental permits acquired according to the corresponding stage (Exploration, construction, and / or production). The activities are designed to generate information before or during each of the mentioned phases and demonstrate the current situation of the different variables involved as a prelude to guarantee healthy practices during the development of the project.

In the context of generating information and reporting it both internally and to the governing institutions of the environmental legal framework at the local level, the information is presented by concession area in accordance with the requirements of current permits and their regulatory framework.

b. ADMINISTRATION AND PERMISSIONS.

1.1.1 Municipal landfill project.

- Completed the technical support to the Municipal Mayor's Office of Santa Rosa del Peñón in the preparation of the Environmental Management Plan and administrative management before MARENA and INAFOR. At the end of the quarter the culmination of the project is in the hands of the municipality of Santa Rosa.

1.1.2 Quarterly reports to government institutions.

- At the end of December, the management of information for the preparation of the quarterly report corresponding to the fourth quarter and the 2022 annual report began, as part of the commitments acquired in concession and environmental permits; scheduled to be delivered to the authorities by the end of January 2023.

1.1.3 Environmental permit.

- 920 plants were donated to INAFOR El Jicaral within the framework of compliance with the delivery of 200,000 plants established in EIA for reforestation.
- MARENA is given 150 pound (68.2 kg) of bird food from the Arlen Siu Zoo as a donation.

Image 3.2.3 a. Delivery of plants to INAFOR El Jicaral and poultry food to MARENA – León

1.1.4 Special permits.

- Coordination of delivery of woody material through the forest regency consultant (LIGSA) and the social area for benefits of the community's people.
- Approved special permits of La India and Tailings Dam sector (TSF) before INAFOR, valid until July 2023.
- Attending the inspection visit of the La India concession by the Ministry of Energy and Mines (MEM) December 19th and 20th.
- Completion of the weekly training in training of environmental workers, in course on planting techniques given by the MEFC (Government).

Image 3.2.4 a. Attending technical commission visit by MEM, Tajo La India - TSF.

Image 3.2.4 b. Participation in agricultural course (Planting Techniques) taught by MEFFCA.

1.1.5 Management of non-hazardous waste.

- 1,194 pounds of general waste, 672 pounds of organic waste and 522.5 pounds of recyclable material were produced in the camping areas located within the concession.
- The construction of a pit for the management of organic waste for compost continues in the Alfa 6 sector, at the end of the quarter completion is at 50%.

Image 3.2.5 a. Progress in construction of pit for organic waste management - compost.

1.2 Nursery Oro Verde.

- At the end of the quarter, there was an inventory of 6,687 plants, managing a monthly average of 6,113, of these 920 were donated and 19 used for replacement in forest areas.
- During this period, the following maintenance activities were carried out:
 - Irrigation if conditions require it
 - Pest control through application of organic chemicals
 - Application of fertilizer
 - Pruning of plants
 - Preparation and mixing of organic soil (rice husks, black earth, and composting)
 - 1,278 plants were reintegrated or transplanted into new bags.
 - The concrete floor of the environmental warehouse was rehabilitated. (60 m2)

Image 3.3.a Activities in the Nursery

1.3 Maintenance of reforestation areas.

- Currently in the concession area of La India, there are six legal agreements for the implementation of forest areas, these are distributed within the 6,771ha concession, in addition to the plant construction area.
- During this month, the following activities were carried out:
 - Manual weed cleaning.
 - Mechanized weed cleaning (use of strimmer)
 - Burning weeds with chemical
 - Making holes and planting 19 plants
 - Application of fertilizers.
 - Irrigation during the month of December

Image 3.4.a Maintenance and reforestation activities

1.4 Fences

- In this quarter only minor repairs were scheduled: repair of 4 access gates and maintenance to 100 m of fence.

Image 3.5.a Maintenance and repair of fences on properties

1.5 Support to other areas of the company

1.5.1 Social Area

- Support in the weekly delivery of water to communities.

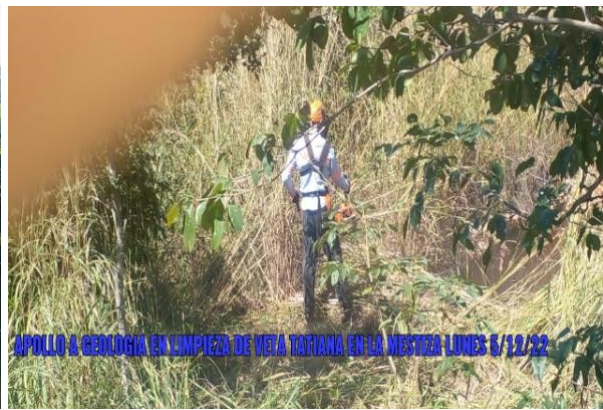

- Pruning of trees in La India school and Health Center.

1.5.2 Geology

- Cleaning of access roads in La India and La Mestiza area

1.5.3 Administration.

- Weed cleaning and tree pruning, viewpoint 1 and 2.
- Cleaning and rehabilitation of roads in viewpoint area.
- Weed cleaning and tree pruning in Alpha 6 camp.
- Cleaning, construction, and improvement work in warehouse areas in Alpha 6.

1.5.4 Hydrology

- Piezometry.
- Cleaning of ARD and Weather Station areas.

c. ENVIRONMENTAL MONITORING

1.5.5 Baseline studies

Condor Gold continues conducting groundwater level and surface water flow monitoring, as well as gathering weather data from its digital weather station and three rain gauges (La India, Agua Fría and La Mestiza locations).

1.5.5.1 Surface water flow

The monitoring of surface water levels continues in 6 different sites within the concession areas of the project, 5 located in the La India sector and 1 in the Americas sector.

- For this quarter continuous flow is recorded at the exit of the San Lucas tunnel located in the Ocotillo sector, the flow has been maintained permanently showing instantaneous peaks according to the behavior of precipitation.
- According to the registered data, the last quarter of 2022 shows the flows in the range of 33 to 78 lps, obtaining an average value of 50.02 lps however, given that during this period of transition from the rainy season to the dry summer season the trend shows that the flow begins its descent towards common values during the dry season, The average value increased by 18.81 lps compared to the previous quarter from 31.2 to 50.02 lps.
- Due to the decrease in rainfall in November and December, the average monthly value decreased 1.4 lps compared to the previous month, this trend will continue downward given the change of weather season in the country and the effect in the project area.

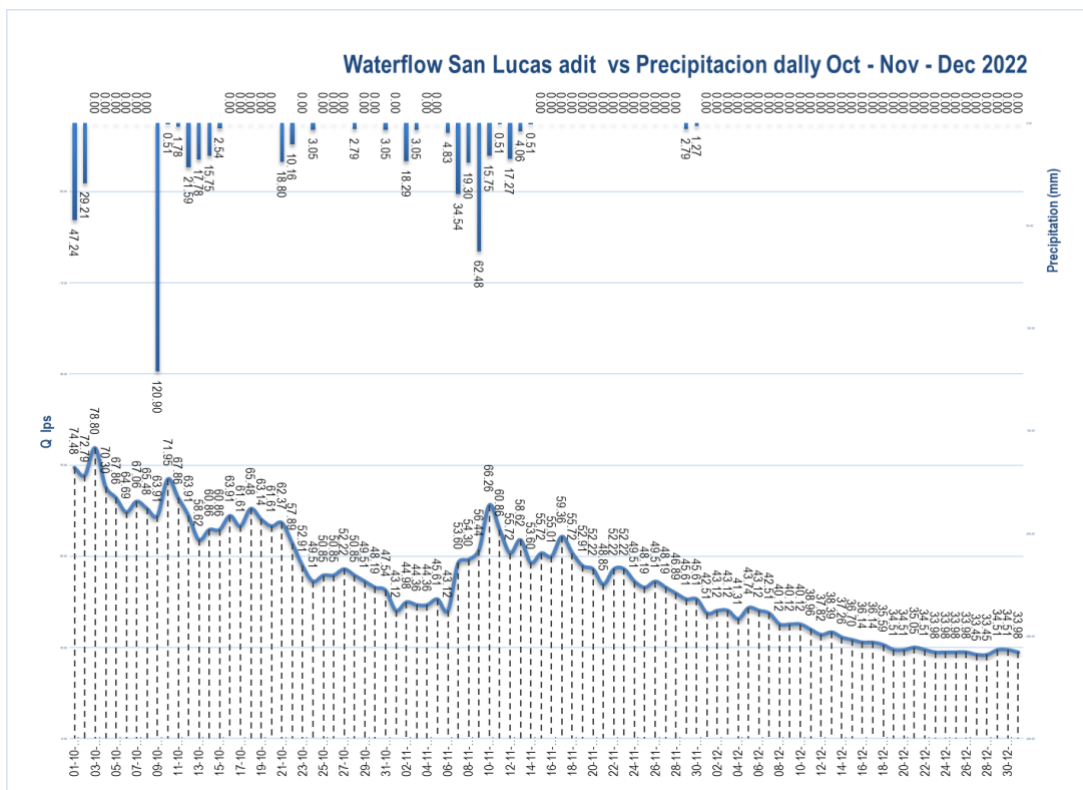

Figure 3.6.1.1 a. Behavior of flows vs precipitation in San Lucas Tunnel - Ocotillo.

- In the same context as the San Lucas tunnel, the behavior of flows in the La Simona dam (weir) shows the same trends - the variation of flows at the level of permanent

and instantaneous, in the case of peak or maximum instantaneous flows, the maximum value of 1,635 lps was registered in November, establishing maximum values in the range of 200 to 1635 lps. With respect to permanent flows, the average was established at 5.33 lps with a fluctuation range between 0.65 and 88.9 lps. Given the change of climatic season the tendency is to decrease having a minimum flow at the end of December of 0.65 lps, waiting for its disappearance in the month of January 2023 since this river is ephemeral.

- For both sites the accumulated precipitation recorded during the last quarter of the year is 479.8 mm, 40% less than the record of the previous quarter (807.57mm)

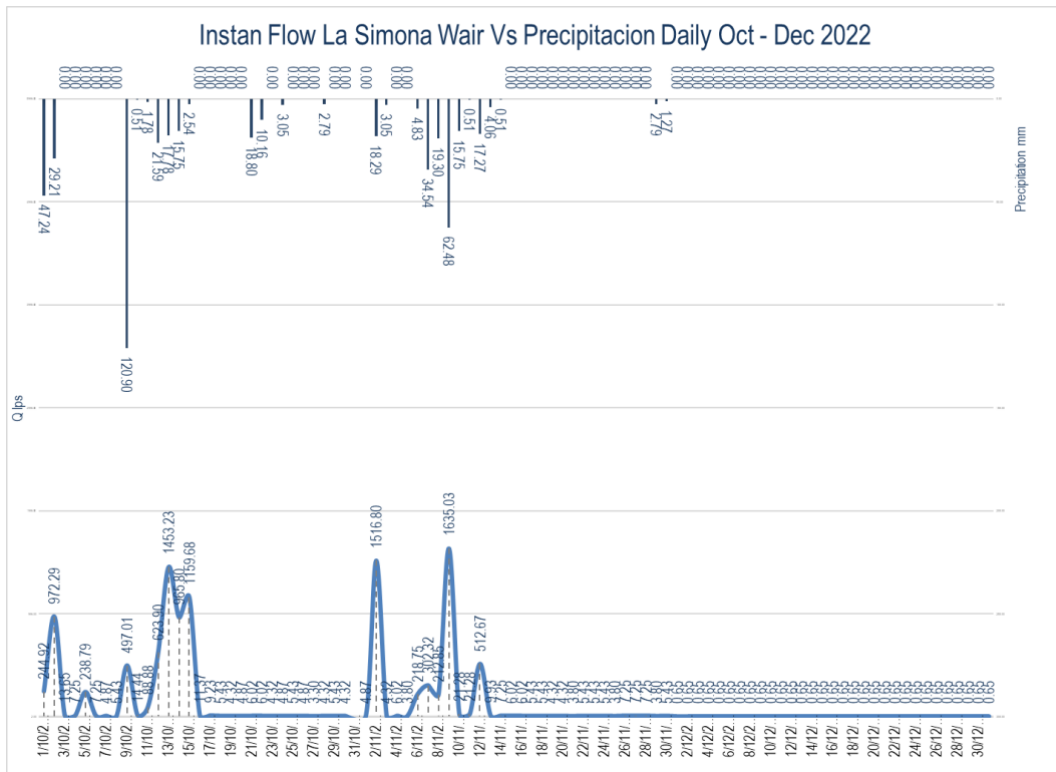

Figure 3.6.1.1 a. Behavior of flows vs precipitation La Simona weir.

4.9.1.2 Groundwater level monitoring

LIGSA conducts weekly continuous monitoring of groundwater levels in 24 wells/piezometers distributed within the La India concession area.

- According to the geomorphological characteristics of the project area and the rainfall conditions during this period (October - November) the variation of static water levels in the current network for deep wells (50 – 302 m) fluctuates between 3 and 98 m, with average values in the range of 43.7 m, with a range between 7 - 34 m.
- With respect to the intermediate depth wells (10 – 49 m) the level values fluctuated between 0.9 and 14.04 m, with an average value of 5.96 with a differential between 0.1 - 1.4 m.
- Regarding the water level in the excavated wells, the values were established between 0.18 – 0.48 m, having an average value of 0.3 m.

	Aguas profundas / Deep water (50 m ≤)		Aguas de profundidad intermedia / Intermediate depth Waters (10 - 50 m)		Aguas de flujo subsuperficial / Subsurface flow water (≤ 10 m)	
La India	W Level (m)	W Colum (m)	W Level (m)	W Colum (m)	W Level (m)	W Colum (m)
Average	43.77	109.73	5.96	10.29	0.30	5.35
Max	98.41	246.84	14.04	14.88	0.48	8.60
Min	2.97	47.03	0.92	4.92	0.18	1.03

Table 4.9.1.2. Behavior of static levels and groundwater columns in La India concession.

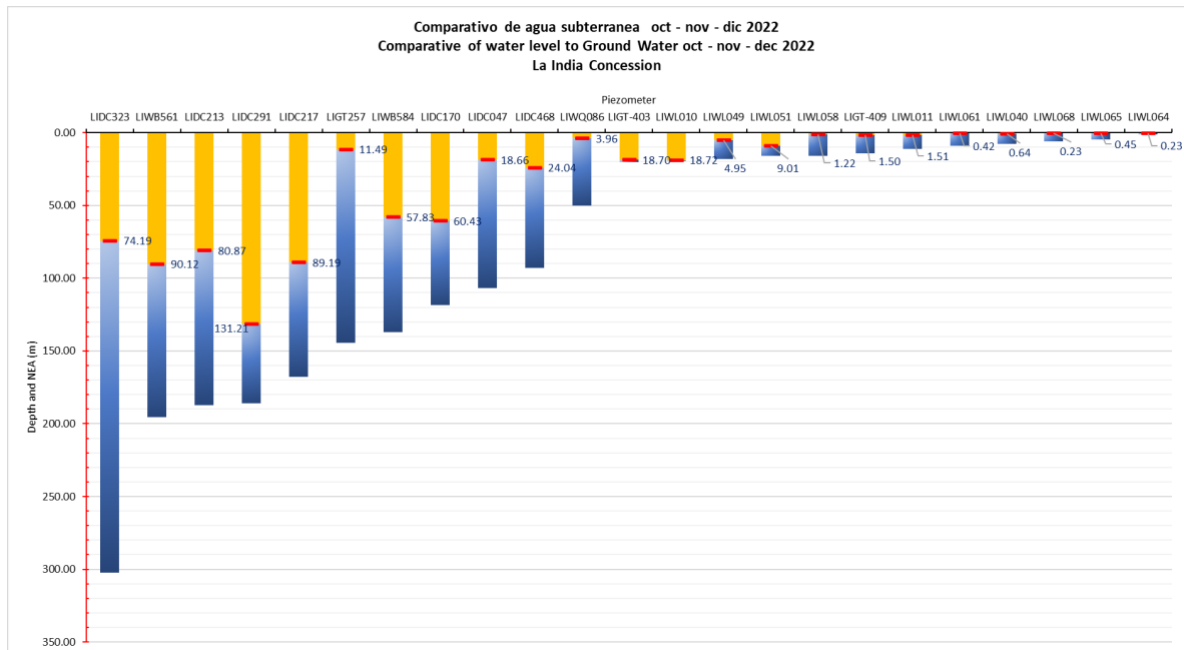

Figure 4.9.1.2. Behavior of groundwater levels in La India concession.

4.9.1.3 Weather data

LIGSA carries out permanent monitoring of climate variables in 5 weather stations, four of them conventional and one digital, the values in the third quarter correspond to the rainy season in the country. The following is the information in the records.

- The digital station was temporarily out of service due to damage in data decoding components due to a storm in August. In September the process of acquisition of parts and tests with the supplier began, however, the main sensor presented failures.
- The process of repairing or purchasing this equipment has begun and the station is expected to be re-established in the first quarter of 2023.

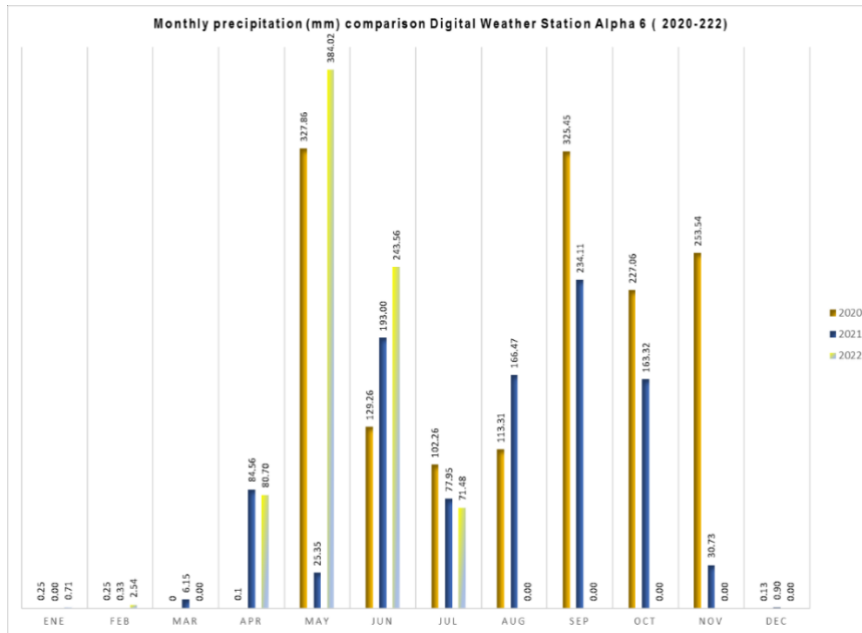

Figure 4.9.1.3 a. Historical data of the Digital Station CONDOR S.A – 2020 – 2022

For this quarter the data recorded by the conventional stations are as follows:

	October	November	December
La India (mm)	295.15	184.66	0
Agua Fria (mm)	271.78	48.28	0
La Mestiza (mm)	272.03	304.6	0

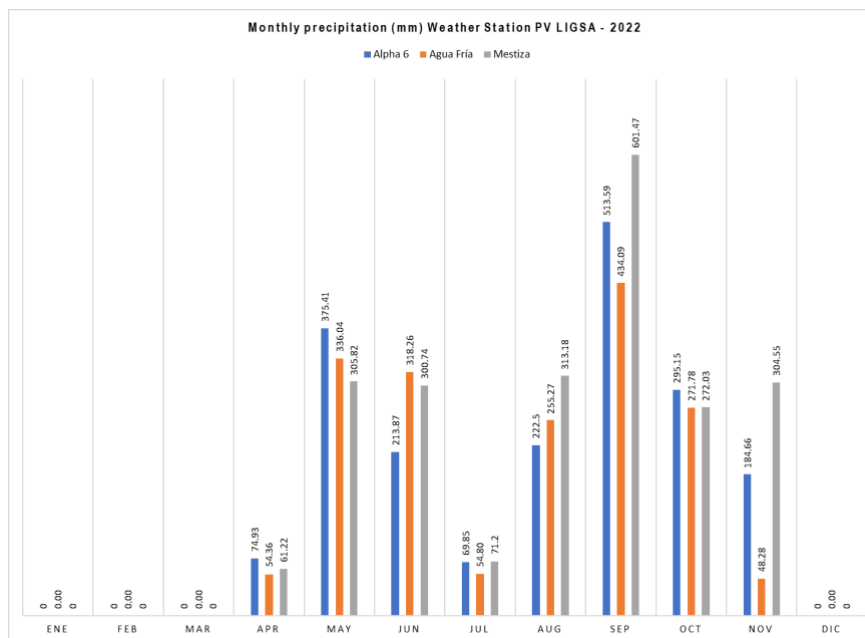

Figure 4.9.1.3 b. Comparative data from Conventional Stations – 2022

4.9.1.4 Systematic Water Quality Monitoring

Activity not scheduled for this quarter.

4.9.1.5 Acid Rock Drainage kinetic study

LIGSA carries out weekly inspections of the leachate volumes for each reactor arranged in its study area.

- In each reactor, physical parameters of leachate water quality are measured.
- The collection of leachate samples corresponding to effluent accumulated up to December 2022 was carried out, they are preserved under refrigeration for future shipment for laboratory analysis in 2023.

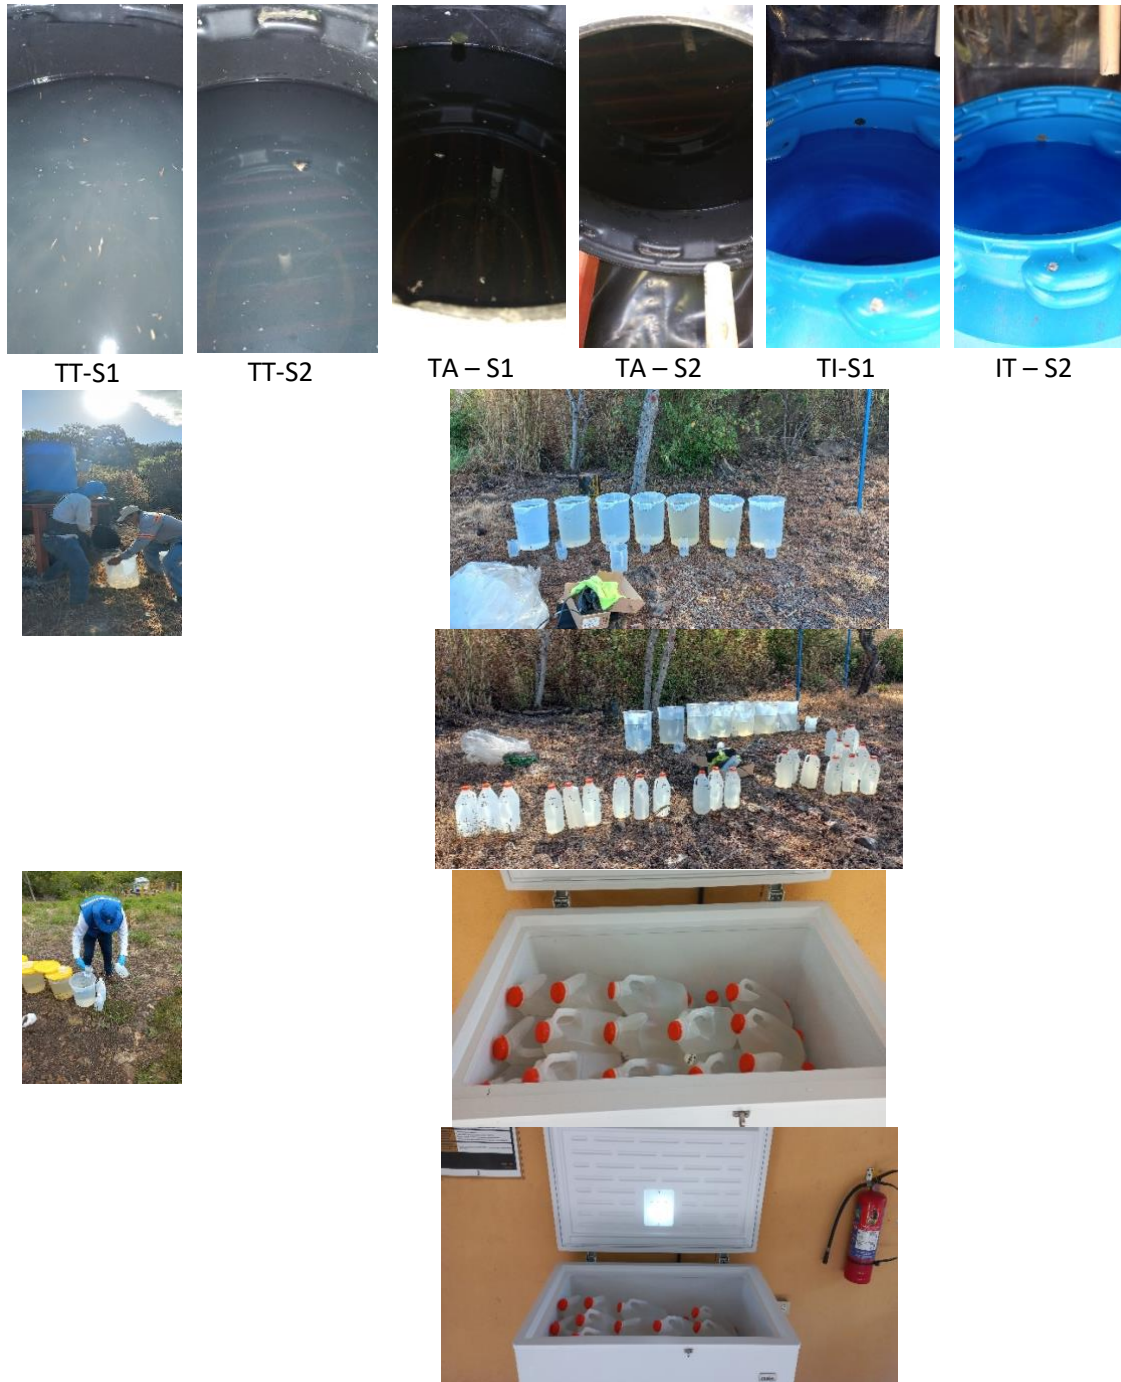

Image 4.9.1.5 a. measurement of physical water quality, collection, and storage of leachate volume.

Reactor /Barrel	N° Week of year	Rainfall accumulated (mm)	Temp (°c)	pH	EC (µS/cm)	ORP (mV)	Sal (ppm)	TDS (mg/l)	Water level in barrel (cm)	Volume of Barrel leachate (L)	Observations
Blank	52	1215	23.8	7.3	16.2	118.0	16.3	12.1	75.0	160.7	Third sampling 01/05/23 clearwater 8:30 am

Table 4.9.1.5 a. Physical water quality and leachate volume for La India concession cores.

- For the present quarter the temperature in each reactor was established in the range of 21 to 34 ° C, with an average value of 28.46 ° C, these values relate to the leachate process during the weathering of the minerals that may occur in the samples contained in each reactor and whose values are obtained by process of analysis of quality of leached water in laboratory, The following graph shows the temperature behavior for each reactor.

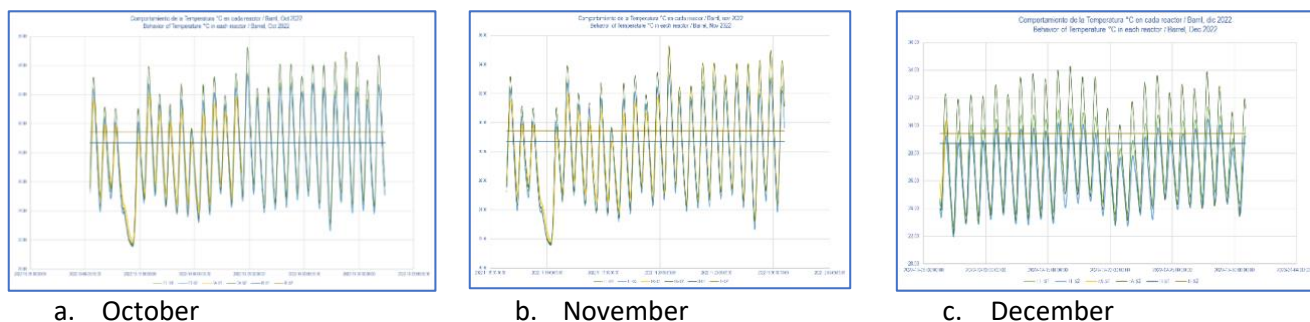

Figure 4.9.1.5 a - c: Behaviour of t°C within each reactor, fourth quarter 2022

4.9.1.6 La India – AGUA FRÍA Drinking Water Project

With respect to the drinking water project for India and Agua Fría, the Social Investment and Emergency Fund (FISE – government institution) concluded the feasibility phase by expanding to two more communities being Monte Verde and La Winston Castillo for an estimated cost of U\$ 4.9 M, which includes water and sanitation for a life span of 20 years with a population projection of 4,112 people. The project is currently in the hands of the central government to define its implementation strategy. The search for funds and approval can take about 1 year.

LIGSA has compiled information and technical and social advice requested by the institutions during the development of prefeasibility and feasibility studies.

II. IMPLEMENTATION OF THE LA MOJARRA ENVIRONMENTAL MANAGEMENT SYSTEM

2.1 ADMINISTRATION AND PERMISSIONS.

- Nothing to report.

2.2 ENVIRONMENTAL MONITORING

2.3 Base Line Studies

2.3.1 Monitoring.

2.3.1.1 Surface water flow.

- Not applicable

2.3.1.2 Groundwater level monitoring

LIGSA performs weekly continuous monitoring of groundwater levels in 16 wells/piezometers distributed within its main concession areas.

- According to the geomorphological characteristics of the project area and the rainfall conditions during this period (October - November) the variation of static water levels in the current network for wells of intermediate depth (10 – 49 m) the values of levels fluctuated between 0.59 and 21.7 m, with an average value of 7.74 m.
- Regarding the water level in the excavated wells, the values of variation were established at 0.2m for both the minimum and maximum range, as well as for the average value.

La Mojarra	Aguas profundas / Deep water (50 m ≤)		Aguas de profundidad intermedia / Intermediate depth Waters (10 - 50 m)		Aguas de flujo subsuperficial / Subsurface flow water (≤ 10 m)	
			W Level (m)	W Colum (m)	W Level (m)	W Colum (m)
Average			7.74	22.09	0.20	5.18
Max			21.72	38.64	0.20	7.60
Min			0.59	8.33	0.20	2.76

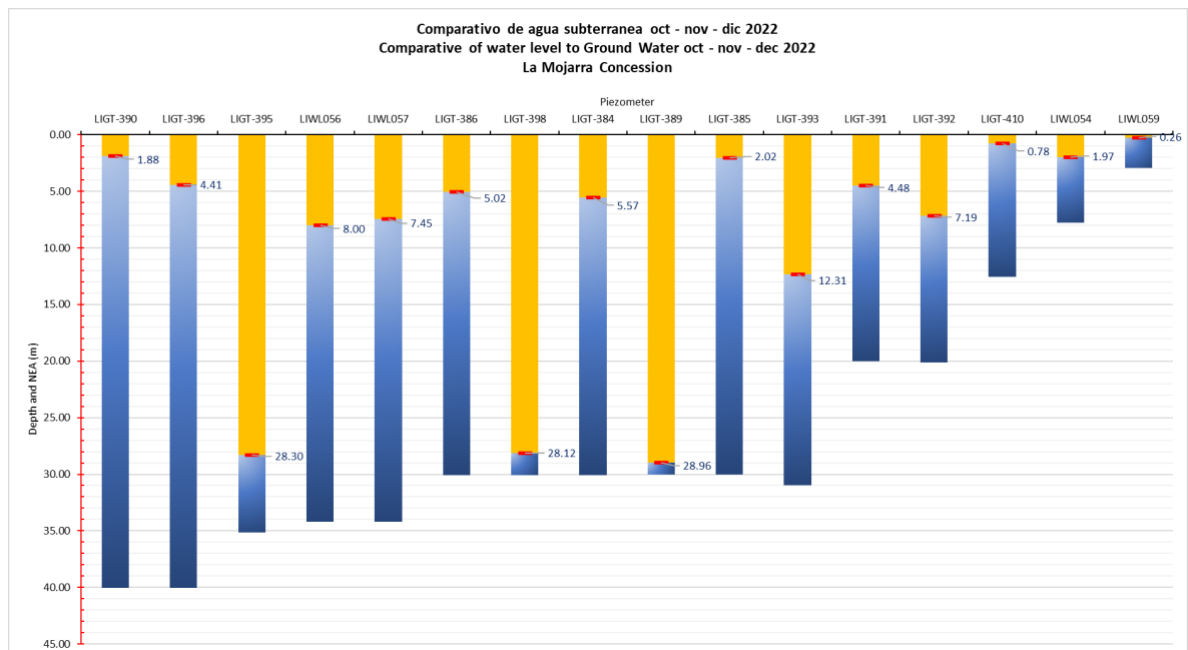

Figure 4.2.2.1 a. Behavior of groundwater levels in La Mojarra concession.

III. IMPLEMENTATION OF THE ESPINITO MENDOZA **CONCESSION ENVIRONMENTAL MANAGEMENT SYSTEM**

3.1 ADMINISTRATION AND PERMISSIONS.

3.1.1 Special permits.

- Coordination of delivery of woody material through the forest reGENCY consultant (LIGSA) and the social area
- Tatiana's special permits approved before INAFOR, valid until June 2023.
- Attendance at inspection visit to the La India concession by the Ministry of Energy and Mines (MEM) December 19 and 20.

Image 5.1.1 a. Attendance at technical commission visit by MEM to Tajo Tatiana - EM.

3.2 Base Line Studies

3.2.1 Monitoring.

3.2.1.1 Surface water flow.

- Not applicable

3.2.1.2 Groundwater level monitoring.

LIGSA performs weekly continuous monitoring of groundwater levels in 16 wells/piezometers distributed within its main concession areas.

- According to the geomorphological characteristics of the project area and the rainfall conditions during this period (October - November) the variation of static water levels in the current network for wells of depth water (80 – 132 m) the values of levels fluctuated between 9 and 36 m, with an average value of 24.8 m.

	Aguas profundas / Deep water (50 m ≤)		Aguas de profundidad intermedia / Intermediate depth Waters (10 - 50 m)	Aguas de flujo subsuperficial / Subsurface flow water (≤ 10 m)
E mendoza	W Level (m)	W Colum (m)		
Average	24.84	77.44		
Max	36.33	98.52		
Min	9.74	54.42		

Table 5.2.1.2 a. Behavior of static groundwater levels in concession E Mendoza.

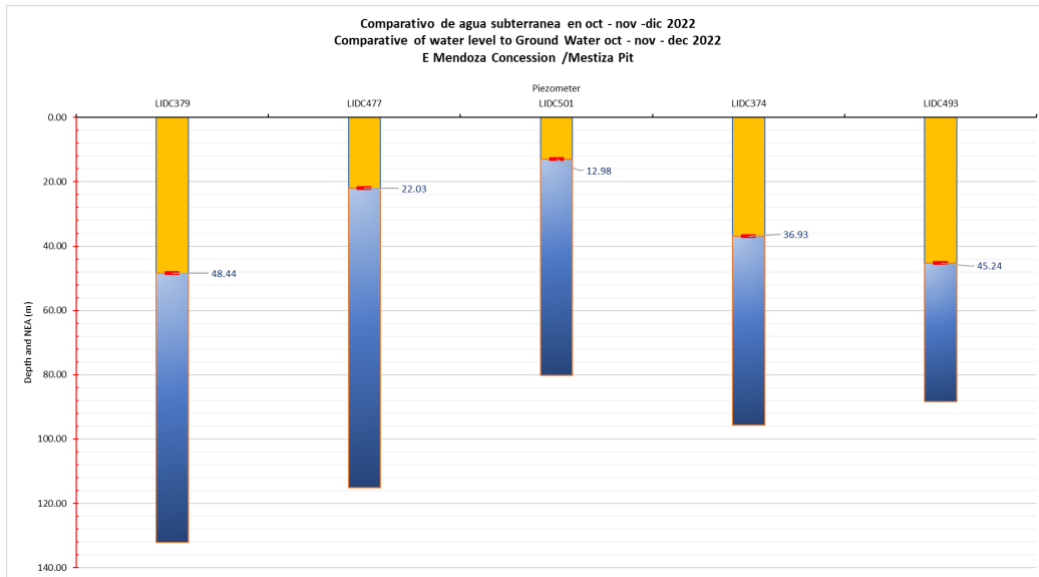

Figure 5.2.1.2 a. Behavior of groundwater levels in Espinito Mendoza concession.

3.2.1.3 Acid Rock Drainage kinetic study (ARD)

LIGSA carries out weekly inspections of the leachate volumes for each reactor arranged in its study area.

- In each reactor, physical parameters of leachate water quality are measured.
- The collection of leachate samples corresponding to effluent accumulated to December was carried out, they are stored under refrigeration for future shipment for laboratory analysis in 2023.
- Values and behavior of temperature for each reactor in equal to conditions described for the reactor of La India concession.

Reactor /Barrel	N° Week of year	Rainfall accumulated (mm)	Temp (°c)	pH	EC (uS/cm)	ORP (mV)	Sal (ppm)	TDS (mg/l)	Water level in barrel (cm)	Volume of Barrel leachate (L)	Observations
Blank	52	1215	23.8	7.3	16.2	118.0	16.3	12.1	75.0	160.7	Third sampling 01/05/23 clearwater 8:30 am

Table 5.2.1.3 a. Physical quality of water and volume of leachate - Espinito Mendoza core.

IV. IMPLEMENTATION OF CACAO CONCESSION ENVIRONMENTAL MANAGEMENT SYSTEM

4.1 ADMINISTRATION AND PERMISSIONS.

- Nothing to report.

4.2 *Maintenance of reforestation areas.*

- The reforestation activities of the Real de La Cruz/Cacao concession are carried out within the Cacao Concession to comply with the environmental exploration permit requirement of said concession.
- There are currently two legal agreements for the implementation of forest areas, these are distributed within the concession and total 2,501 Ha (map in annex); During this month, the following activities were carried out:
 - o Manual weed cleaning.
 - o Mechanized weed cleaning (use of strimmer)
 - o Burning weeds with chemicals
 - o Making holes and planting 109 plants
 - o Application of fertilizers.
 - o Irrigation if conditions require it.

Image 6. 2.a. Reforestation activities concession Cacao sector Soledad de la Cruz

4.3 ENVIRONMENTAL MONITORING

- Not Applicable

V. SOCIAL ACTIVITIES

A. STAKEHOLDER ENGAGEMENT IMPLEMENTATION

Meetings with local stakeholders.

During this quarter, the company held more than 120 meetings with the leaders of the social programs to coordinate the activities carried out with the members of the programs and the community in general.

Main topics addressed were:

- Water program
- Senior program
- Social contributions
- Business program
- APROSAIC
- Artisanal mining
- Youth in action
- Happy childhood

Communication campaign.

During this quarter the company participated in the assemblies of the Drinking Water Project for La India and Agua Fria, in addition to motivating families to continue drinking quality water through the Agua Fresca program that brings water to their homes.

The company provided statements to the media given the news of the sale of the company that caused controversy nationwide.

COMMUNITY RELATIONS PLAN IMPLEMENTATION.

La India Gold developed a social investment plan oriented to generate conditions to promote better community relations in the areas of direct and indirect area of influence of the project, with a focal on water, communication, support for small mining, among other contributions and programs.

During the quarter, the investment was **US \$ 42,428.14** in the following items:

SOCIAL INVESTMENT					
N°	Area	October	November	December	Total
1	Communication	\$ 6,032.88	\$ 5,940.88	\$ 7,525.53	\$ 19,499.29
2	Water	\$ 1,961.82	\$ 2,566.08	\$ 1,393.03	\$ 5,920.93
3	Artisanal Mining	\$ 797.51	\$ 755.07	\$ 1,344.03	\$ 2,896.61
4	APROSAIC	\$ 930.66	\$ 1,953.34	\$ 2,400.47	\$ 5,284.47
5	Elderly	\$ 1,304.36	\$ 1,059.26	\$ 965.76	\$ 3,329.38
6	Small business	\$ 357.15	\$ 357.15	\$ 357.15	\$ 1,071.45
7	Others	\$1,610.19	\$ 1,239.15	\$ 1,464.90	\$ 4,314.24
8	Tatiana and America social license	\$ -	\$ 111.77		\$ 111.77
Total		\$ 12,994.57	\$ 13,982.70	\$ 15,450.87	\$ 42,428.14

Table #1. Social investment IV quarter 2022

Contributions and Donations Program.

During the months of April to June, the delivery of contributions was distributed as follows: transportation (3), contributions to churches (13), other contributions (27), education (3), and community mourning (2).

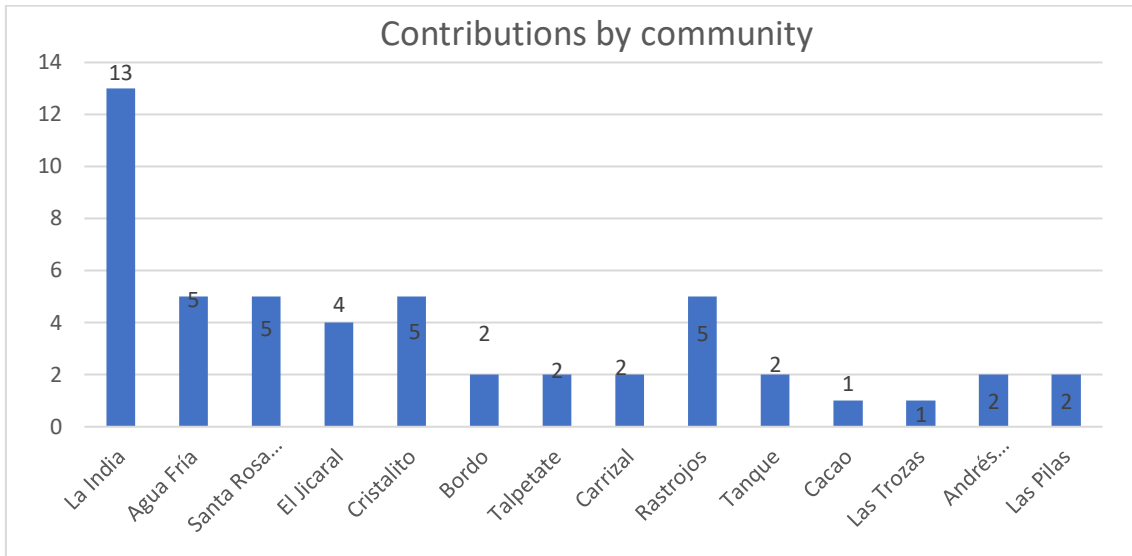

Individuals and institutions have been indirectly benefited, representing a broad reach of the program in the communities.

Item	Activity	Beneficiaries Direct	Communities	Month

On December 27th, 2022, the business program celebrated 5 years of being formed. This program began with the purpose of supporting the development, advancement, and growth of local businesses in Santa Cruz de la India.

The year closes with 52 active members who participated in all the activities that took place throughout the year.

For 2022, the strands of work followed a relationship strategy in order to maintain rapprochement with business owners and get them involved in activities which benefit the local economy.

As part of the program, there are self-sustainable projects that have strengthened the community's economy: Community Bank, Community Savings Program and Community Room Rental Project.

APROSAIC

APROSAIC is a program that promotes and manages the economic, social, and cultural development of communities surrounding the mining project, which with the support of CONDOR GOLD-Mina La India and the collaboration of community leaders, actions are carried out that contribute to the improvement of the quality of life of citizens. Started in September 2017 and for this year its axes of work are: Health, Education, Culture And Community Leadership.

APROSAIC serves 6 communities surrounding the Mining Project, one (1) direct influence and five indirect (5). The program has a board of directors of 3 members, 20 community leaders and 15 health brigades.

Community leadership: with community leaders, the year was closed, providing them with a summary of the activities that were carried out during 2022.

Education: In partnership with directors of the MINED of Jicaral, mayors of Santa Rosa del Peñón and Jicaral, closure activities were carried out in the 5 schools served by APROSAIC in the communities of: Nance Dulce, El Bordo, Carrizal, Cristalito and Rastrojos.

Health: Training was provided to health brigades to strengthen care in Community health care home also residents participated in health fairs that were held in partnership with MINSA de Jicaral and Santa Rosa del Peñón.

Culture: The Raíces Doradas dance school continued to teach classes on Fridays to strengthen the artistic skills of the 42 students who are part of the school. School closures were also carried out for evening and morning shifts.

Condor Gold through APROSAIC continues to work hand in hand with community leaders and support the development of communities.

INDEPENDENT ARTISANAL MINERS INVOLVEMENT GROUP

Work continues alongside independent miners who have the benefit of exploiting ore artisanally on the property of the company, known as La Mestiza and La India. This is permitted as long as they comply with the regulations and provisions that the company, through its artisanal mining

equipment, enforces in this property. In both properties 24 groups work who benefit from greater income for their families since they do not pay any percentage for extraction.

B. IDENTIFICATION OF VULNERABLE FAMILIES

C. TATIANA AND AMERICA PROJECT

In January 2020, the relationship began in the communities of El Tanque, Talpetate, El Capulín and Quebrachal, communities that are of indirect incidence of the secondary projects America and Tatiana, complements to the main project La India.

For this year 2022 the axes of work are: Community leadership, Education, Health and community relations.

In the 4 communities the total population is 115 families and 434 inhabitants.

During the quarter, relations were maintained with families in the communities through house-to-house visits.

Photo summary

Project Name	Project Description	Total, Individuals Benefited			Month
		Total	F	M	
RELATIONSHIP	Visits to 75 homes in the community El Tanque and Talpetate.	75	-	-	October

D. ALLIANCES

Condor Gold – Mina la India, since the beginning of 2022, has been creating a platform backed by allied organizations committed to the welfare and social development for the population of the communities surrounding the Mining Project.

During the last quarter of the year, we worked in partnership with MEFCCA, MINSA, MINED and mayors of Santa Rosa del Peñón and Jicaral for the development of workshops and activities with families from the communities of Santa Cruz de la India and communities surrounding the mining project.

The year ended maintaining good relations with institutions and implementing the new model of social management: Shared Responsibility.

Project Name	Project Description	Total, Individuals Benefited			Month
		Total	F	M	
Agua Fresca and America and Tatiana	Meeting with the director of the MINSA of Santa Rosa del Peñón to manage medical care for Agua Fría, El Taque and Talpetate. Managing to agree on medical attention for November 3 and 15.	2	2		October
Independent miners	Representatives of central MEFCCA Managua and León meet with community leaders and artisanal miners to propose and explain goldsmithing courses.	15	8	7	October
Condor Gold Partners	Collaborators from the environmental area of Condor Gold participate in 4 virtual meetings of the Diploma in "Technologies to improve Agricultural Production and Productivity".	9		9	October
Cooperative miners	Meeting with president of the Red Cross León branch, to manage a sight day aimed at cooperative miners.	2	1	1	October
Condor Gold Partners	Collaborators from the environmental area of Condor Gold participate in 4 virtual meetings of the Diploma in "Technologies to improve Agricultural Production and Productivity".	9		9	November
Water is life	MEFCCA de León and Santa Rosa del Peñón, visited 11 vertical gardens located in Santa Cruz de la India, to provide recommendations for improvement.	11	11		November
Condor Gold Partners	Collaborators from the environmental area of Condor Gold participate in 4 virtual meetings of the Diploma in "Technologies to improve Agricultural Production and Productivity".	9		9	December

E. INFORMATION OFFICE

The Mining Project, with the aim of maintaining relations with the population, has at its disposal the Information Office, with the aim of providing information about the progress of the project and attention to concerns, complaints and claims of communities surrounding the Project.

This space is also used to hold meetings and activities with members of the boards of directors of the different programs, meetings, workshops and training and is the point of distribution of water through the Agua Fresca program.

In addition to the issues already addressed by the information office, from the first quarter of 2022 we will begin to work on four axes to achieve the objective of the new strategy:

- Information Office.
- Mining Education.
- Recreation with education.
- Workshops.

Here is the detail of visits of the fourth quarter 2022:

TOTAL VISITS TO THE INFORMATION OFFICE				
Program	October	November	December	Total
Artisanal Mining	4	6	18	28
Water Program	33	17	12	62
Request for support	3	7	1	11
Job Application	1	0	3	4
Senior Program	10	24	7	41
Meeting with leaders	41	0	21	62
Business Program	11	5	5	21
APROSAIC	0	0	0	0
Youth in Action	0	15	0	15
Engagement Activity	10	8	1	19
Cooperative miners	9	19	0	28
Other	0	0	1	1
Happy Childhood Program	0	0	0	0
TOTAL	122	101	69	292

Detail of visits, according to origin of visitor:

N°	Origin	October	November	December	Total
1	Mina la India	74	72	36	182
2	Agua Fría	9	5	2	16
3	San Isidro	0	1	0	1
4	El Tanque	1	0	3	4
5	El Cristalito	7	5	4	16
6	El Bordo	10	4	14	28
7	Talpetate	3	4	1	8
8	Santa Rosa del Peñón	0	2	0	2
9	Soledad de la Cruz	1	0	1	2
10	El Carrizal	1	0	3	4
11	Los Rastrojos	2	0	5	7
12	Managua	5	1	0	6
13	Nance Dulce	6	4	4	14
14	León	3	0	3	6
15	Wistón Castillo	0	1	0	1
16	Monte Grande	0	2	0	2
17	Malpaisillo	0	0	1	1
	TOTAL	122	101	77	300

If we calculate these visits by origin, we obtain the following:

N°	ORIGIN	%
1	Mina la India	61%
2	Agua Fría	5%
3	San Isidro	0%
4	El Tanque	1%
5	El Cristalito	5%
6	El Bordo	9%
7	Talpetate	3%
8	Santa Rosa del Peñón	1%
9	Soledad de la Cruz	1%
10	El Carrizal	1%
11	Los Rastrojos	2%
12	Managua	2%
13	Nance Dulce	5%
14	León	2%
15	Wistón Castillo	0%
16	Monte Grande	1%
17	Malpaisillo	0%
	TOTAL	100%

Noting that the community with the greatest presence at the information office is Mina La India with 61% of the total, followed by the community of El Bordo that represents 9%. In third place the community of Agua Fría and Nance Dulce both with 5%.
