Executive summary

1. Introduction
2. Objective
3. Environmental activities
  - 3.1. Environmental monitoring
    - 3.1.1. Baseline studies
  - 3.2. Environmental management
    - 3.2.1. Environmental Management System implementation
    - 3.2.2. Tree Nursery "Oro Verde"
    - 3.2.3. Implementation of reforestation plans and activities
  - 3.3. Other activities
    - 3.3.1. Water project for La India and Agua Fría villages
4. Social activities
  - 4.1. Stakeholder engagement implementation
    - 4.1.1. Meetings with local stakeholders
    - 4.1.2. Bilateral meetings with local stakeholders
    - 4.1.3. Communication campaign
  - 4.2. Community Relations Plan implementation
  - 4.3. Identification of vulnerable families
  - 4.4. Tatiana and America projects
  - 4.5. Information office
5. Capacity building

## GLOSSARY OF ABBREVIATIONS

APROSAIC	Association of settlers for the economic, social and cultural development of the village of Santa Cruz de la India and nearby communities
CAPS	Potable Water and Sanitation Committee.
MARENA	Ministry of the Environment and Natural Resources
MEM	Ministry of Energy and Mines
SILAIS	Local system of comprehensive health care
NGO	Non-governmental organizations
INIFOM	Nicaraguan Institute for Municipal Development
INATEC	National Technological Institute
ENATREL	National Electricity Transmission Company
UNI	University of Engineering
UNAN León	National University of León
ESIPSA	Professional internal security company S.A.
EIA	Environmental Impact Assessment
INAFOR	National Forestry Institute
DAEM	Explosives and Weapons Directorate
ENACAL	Water and Sanitation Company
COPTRAMIN	Cooperative of Production and Work of Traditional Artisanal Miners of La India Community

Condor Gold has developed an internal prevention protocol with our employees, which includes sanitary measurements within the installations and towards the surrounding communities, such as:

- Talks given and written pamphlets on sanitary measurements and COVID-19 prevention were distributed to employees.
- Avoid social gatherings as much as possible and promote social distancing in common areas.
- Use of masks for employees is obligatory in the installations and villages.
- Cleaning outside and inside of vehicles after each use.
- Alcohol spray (small) is distributed for all employees and for desk/computer cleaning.
- Benzalkonium chloride is distributed for all the employees to use in their houses to clean surfaces.
- Disinfectant booth, washing hands, shoe disinfection and thermometers are used at the entrance of the offices.
- Suppliers are met outside the office areas to reduce contact with employees.
- Guidelines for kitchen area and cleaning procedures have been modified and the use of common items has been eliminated.
- Villagers in the social programs and local schools have received talks, as well as sanitary supplies (alcohol, chlorine, etc).

As of November 2020, Condor Gold resumed normal activities, all employees working full time, but with sanitary measurements and social distancing and sanitary measurements being implemented to avoid spreading of Covid-19 and ensure the safety and health of its employees and surrounding communities.

## Executive summary

Condor continues to implement its Environmental and Social Management System, which includes Environment, Community, Health and Safety and Human Resources. Activities were restarted in November with sanitary measurements and social distancing in place.

The environmental work was focused on monitoring the level of groundwater and surface water, monitoring climatic parameters, water management, waste management and recycling, maintenance of the plants in the "Oro Verde" nursery and maintenance of 8 reforestation areas located in La India and 2 in Real de la Cruz concessions. Daily 5-minute talks were given to workers on environmental, industrial and social safety issues; support was provided to different areas of the company; environmental awareness activities were also carried out with workers from the environment and social area; participation in the national reforestation plan, through the donation of plants requested by INAFOR, city mayors, MINED and Sandinista Youth, as well as nearby communities to the area of influence of La India mine project; and support for León zoo as part of company's Biodiversity program.

Other activities included the preparation and delivery of quarterly environmental reports to government institutions. The company accompanied MEM as part of a complaints procedure against artisanal mining located in Real de la Cruz Concession, which did not have authorization from the property's owner- Condor was summoned to participate (support as owners of the Concession). The first water monitoring was coordinated as part of the Hydrology Baseline; delivery of reports to all competent Institutions (MARENA, MEM , Municipalities and MINSAs), a meeting was held with the Santa Rosa del Peñón Municipality on the preparation of the project profile document and PGA to be presented to MARENA; tree cutting activities were carried out in the sector on the way to mestiza as part of the safety to workers, since, due to rains, there were several incidents of falling trees; property fencing activities were carried out and in April 8 forest fires were extinguished.

The social area continues to work on maintaining the social license with every community neighboring the mining project through various relationship programs and various communication actions with stakeholders.

The company's social investment has focused on social programs: Contributions and Donations (addressing issues related *inter alia* to education, health, sports, community mourning; during this period, 44 contributions were delivered to individuals and organizations), Agua Fresca (program benefits 458 families from Santa Cruz de la India, Agua Fría and 26 property owners), Seniors program (85 members), APROSAIC (works with the communities neighboring the project), Agua es Vida program (which has 135 members), Businesses program (comprising 55 entrepreneurs), Youth en Acción program (which benefits 21 youth) and Happy Childhood (which benefits 38 children).

## 1. INTRODUCTION

This report is part of Condor Gold’s commitment to continuous improvement and monitoring of the implementation of its Environmental and Social Management System (ESMS) in the areas of Environment, Social and Community Relations and Human Resources; ensuring transparency with its shareholders and relevant stakeholders.

## 2. OBJECTIVE

To inform stakeholders about the implementation of the Environmental and Social Management System in the areas of Environment, Social and Community Relations, and Human Resources during the third quarter of 2021.

## 3. ENVIRONMENTAL ACTIVITIES

### 3.1. ENVIRONMENTAL MONITORING

#### 3.1.1.1. Surface waterflow

- The monitoring of surface water levels continues in 6 different sites within concession areas, 5 located in La India sector and 1 in the Americas sector.
- For this quarter there is a continuous flow in San Lucas tunnel located in Ocotillo sector, as well as instantaneous flows in La Simona landfill; the flow behavior in both sites and in the rest of landfills is the product of rainfalls that occurred in the project area, and accumulation of groundwater in the sector of the old La India Mine (the old San Lucas adit). The variation of flows in San Lucas – Ocotillo landfill for this quarter is in the range of 23 to 56 lps, with an average of 32.66 lps; the variation is due to rainy period which has been established to be above normal in these months compared to last year.

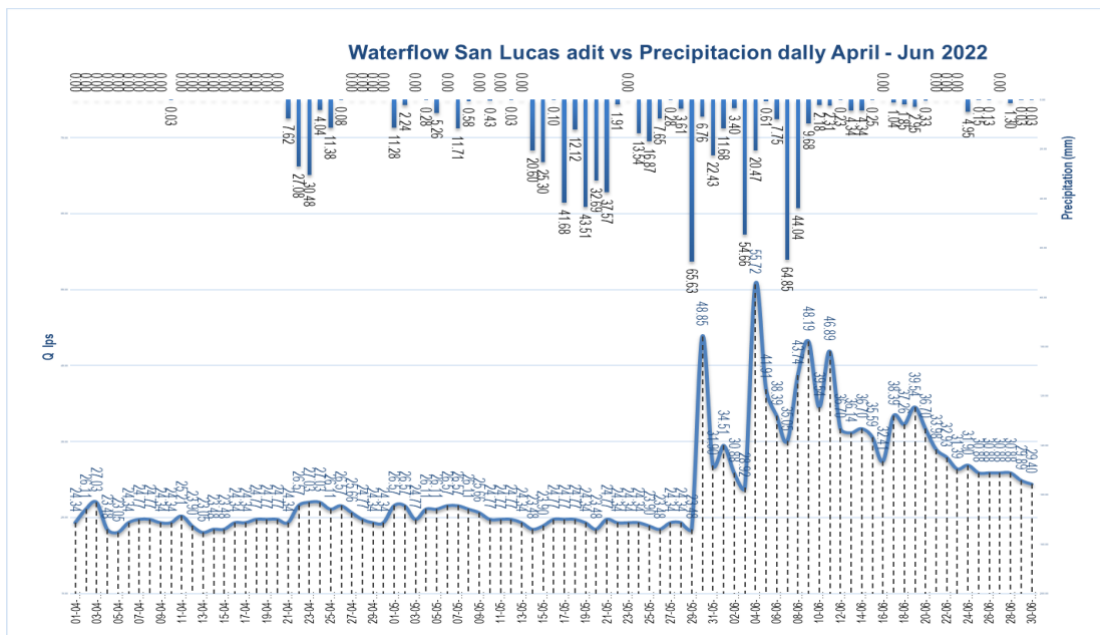

Figure 1.1.1 a. Comparative behavior of water levels vs precipitation in San Lucas Túnel - Ocotillo.

- Regarding La Simona landfill: the basin began the generation of instantaneous flows in this monitoring site from May, registering a maximum value of 372.7 lps in May and 28.1 in June - the following graph shows the behavior of the maximum flow days.

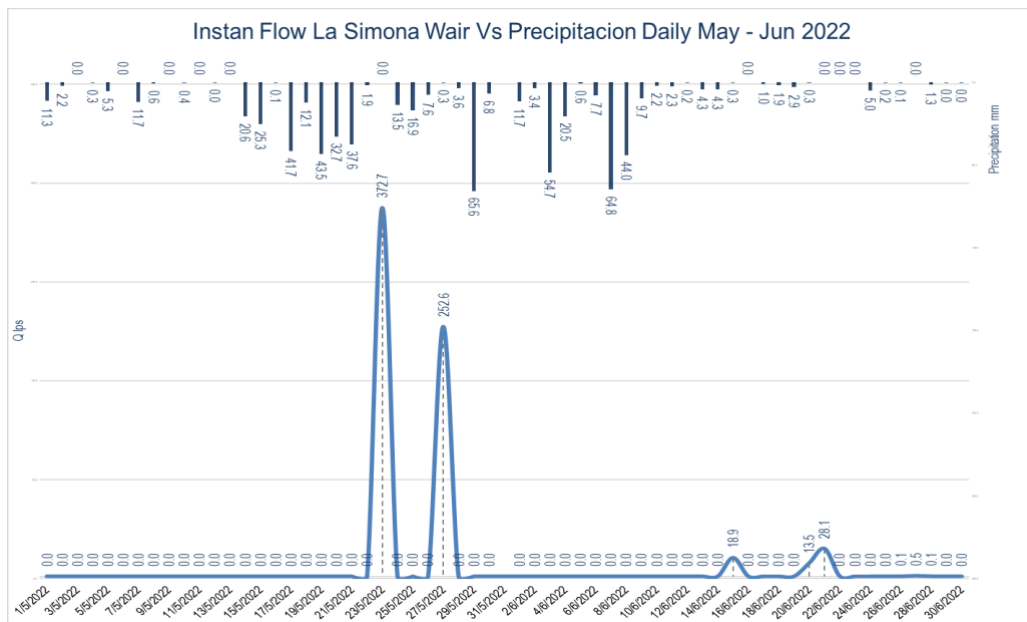

Figure 1.1.1 b. Comparative behavior of water levels vs precipitation in La Simona Landfill.

### 3.1.1.2. Groundwater level monitoring

- LIGSA carries out the continuous monitoring of groundwater levels in 24 wells / piezometers distributed within its main concession areas and checks these on a weekly basis.
- The variation of static water levels in the current network fluctuates according to its location with respect to the geomorphology and depth of the wells whose range is between 1 and 398 m, and whose water levels for this quarter are in the range of 10 to 132 m, with average values in the range of 63 m deep for deep drilled wells, in the case of intermediate depths the range is established between 0.3 and 18 m with an average value of 10 m, and 2.25 m for shallow wells.

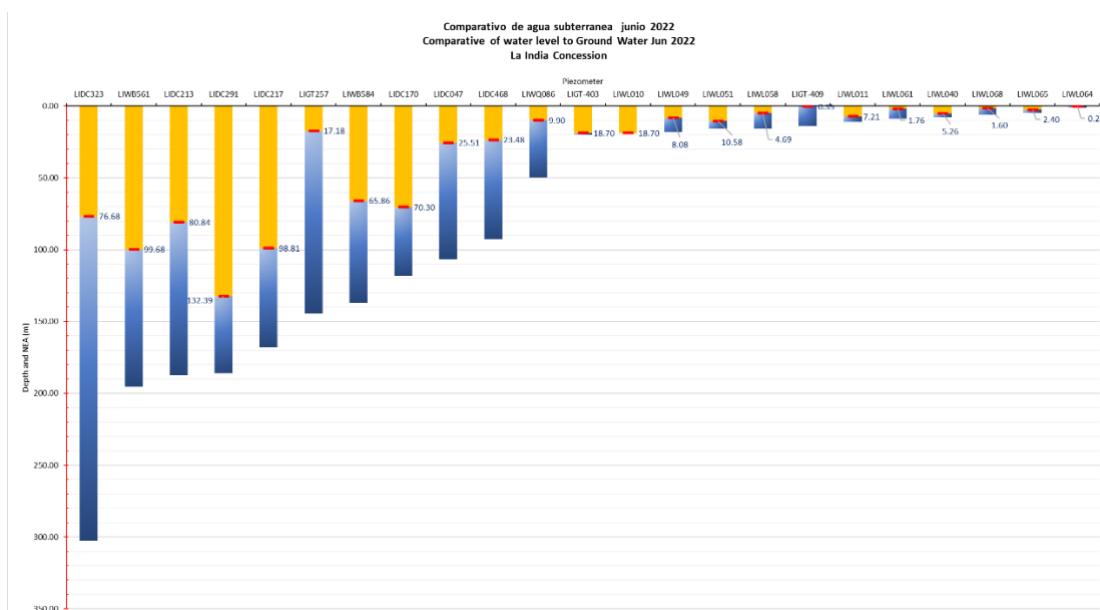

Figure 1.2.1 a. Comparative behavior of groundwater levels in La India concession.

**1.3 Water Balance Study.**

- Water balance model within feasibility studies

**1. Dewatering Project.**

- Design and operational strategy proposed in feasibility studies.

**2. Leachate or Acid Rock Drainage (ARD) Project**

- Beginning of collection and preservation of leachate samples corresponding to April and May.
- Data on physical water quality and leachate volume were collected fortnightly in each reactor. The values to date are as follows:

Table 1.3.1 a. Physical water quality and leachate volume to date for La India concession cores.

Reactor /Barrel	N° Week of year	Rainfall accumulated (mm)	Temp (°C)	pH	EC (µS/cm)	ORP (mV)	Sal (ppm)	TDS (mg/l)	Water level in barrel (cm)	Volume of Barrel leachate (L)	Observations

**3.1.1.3. Climate.**

LIGSA carries out continuous monitoring of climate variables in 5 weather stations, four of them manual and one digital. The values in the first quarter correspond to country’s summer season; then the.

- Data recorded by the Digital Station CONDOR S.A.

Parameters	April	May	June
Precipitation (mm)	80.7	384.02	243.56
Maximum temperature °C	28.1	27.9	25.4
Minimum temperature °C	25.0	23.4	22.7
Maximum relative humidity (%)	92.2	85.2	92.2

Parameters	April	May	June
Minimum relative humidity (%)	23.3	50.1	38.7
Wind direction	SE	SE	SE
Average wind speed (m/s)	6.3	3.7	4.1

### 3. La India – Agua Fría Drinking Water Project

LIGSA manages an inter-institutional commission that carries out the La India and Agua Fría water project. The company, through the hydrology area works together with technicians from the Mayor's Office of Santa Rosa del Peñón, the National Water Authority (ANA), the Social Investment Fund (FISE) and ENACAL are in the process of generating technical and baseline information to be used in the formulation of the project with an overall progress of the feasibility study of 75%

To date, the following components have been completed:

- Hydrogeological study for water source
- Environmental Report.
- Socio-economic baseline of the project
- Water demand
- Electrical component
- Hydraulic component
- Sanitation system plans.

### 4. Feasibility Studies.

Pending final reports from SRK International Consultants.

**La MOJARRA**

**1. Monitoring.**

**1.1 Surface Water.**

- NOT APPLICABLE

**1.2 Groundwater.**

- LIGSA carries out continuous groundwater level monitoring of 16 wells / piezometers distributed within its main concession areas and collects data weekly.
- The variation of static water levels in the current network fluctuates according to its location with respect to the geomorphology and depth of wells - range is between 3 to 40 m- and water levels for this quarter are in the range of 0.54 to 29 m, with average values of 16 m deep for drilled wells and 0.52 m for dug wells.

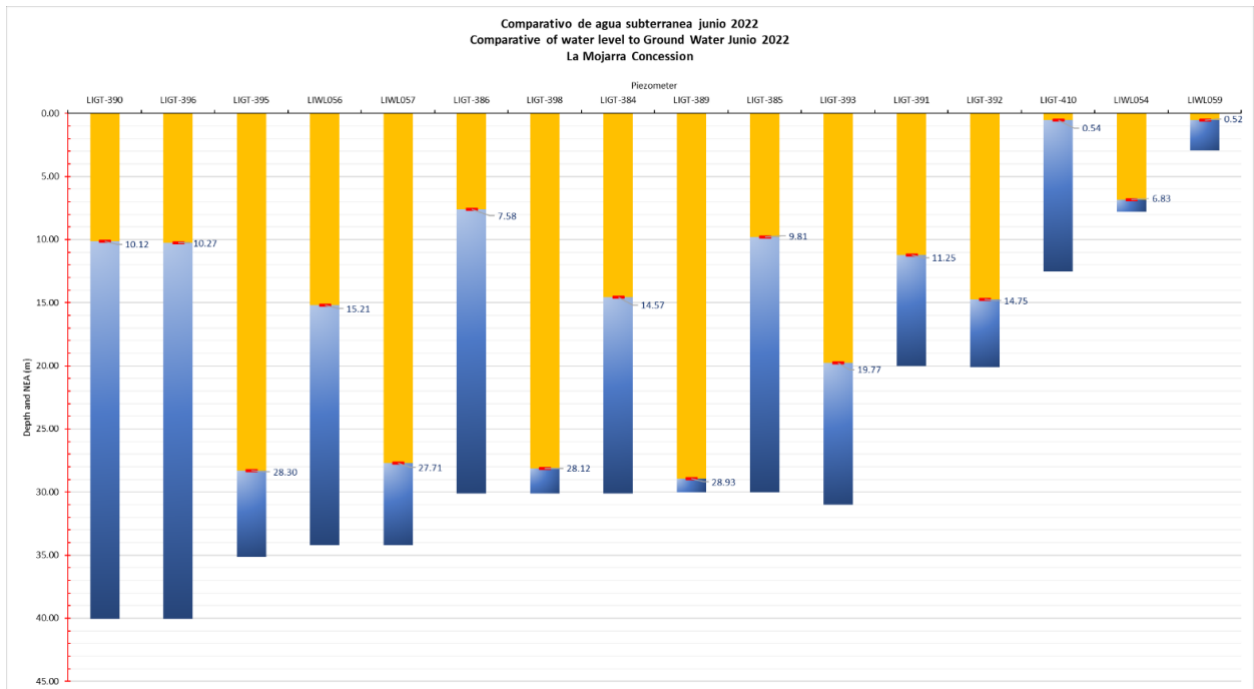

Figure 1.2.1 a. Comparative behavior of groundwater levels in La Mojarrá concession.

## 2. Leachate or Acid Rock Drainage (ARD) Project

- Applies to the values described in Table 1.3.1 described in Concession La India.

### ESPINITO MENDOZA

#### 1. Monitoring.

##### 1.1 Surface Water.

- NOT APPLICABLE

##### 1.2 Groundwater.

- LIGSA carries out continuous monitoring of groundwater levels in 5 wells / piezometers distributed within its main concession areas and collects data on a weekly basis.
- The variation of static water levels in the current network fluctuates according to its location with respect to the geomorphology and depth of the wells whose range is between 88 to 126 m, and whose water levels for this quarter are in the range of 17 to 53 m, with average values in the range of 40 m deep.

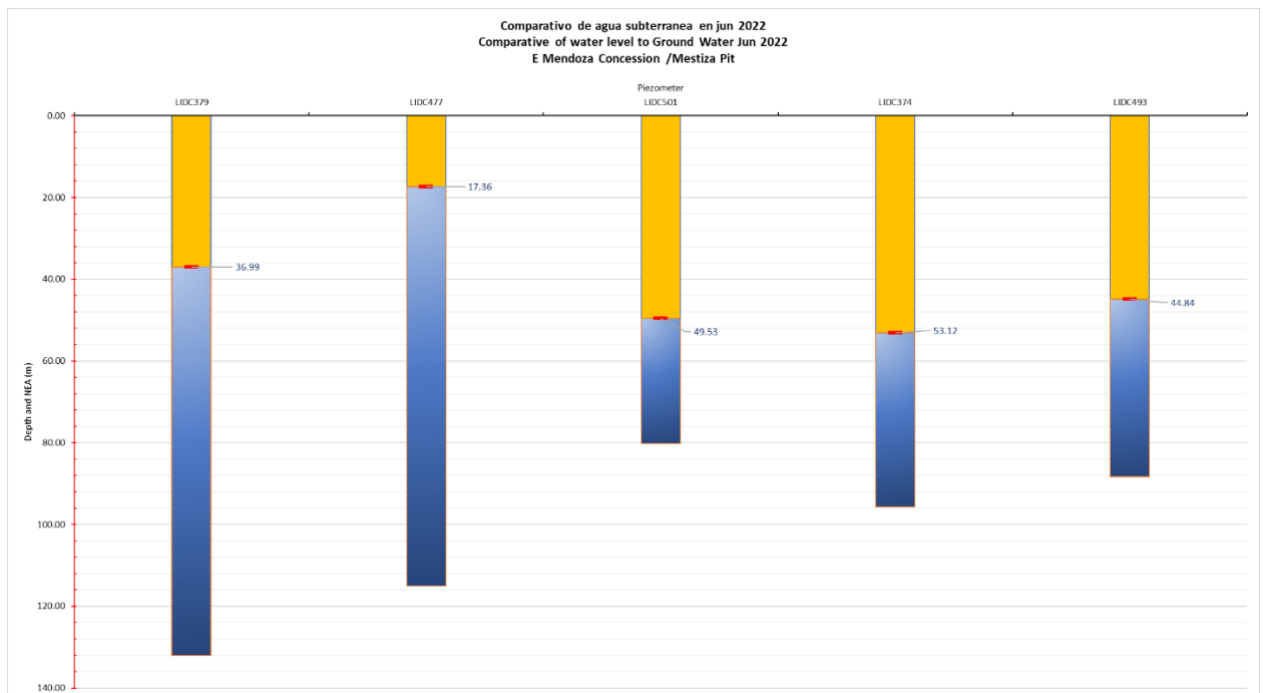

Figure 1.2.1 a. Comparative behavior of groundwater levels in the Espinito Mendoza concession.

## 2. Leachate or Acid Rock Drainage (ARD) Project

- Started the process of collection and preservation of leachate samples corresponding to the months of April and May.
- Data on physical water quality and leachate volume are collected fortnightly from each reactor. The values to date are as follows:

Reactor /Barrel	N° Week of year	Rainfall accumulated (mm)	Temp (°c)	pH	EC (uS/cm)	ORP (mV)	Sal (ppm)	TDS (mg/l)	Water level in barrel (cm)	Volume of Barrel leachate (L)	Observations
TT - S1	22	425.11	24.9	7.55	170.5	69.8	83.3	120	61.2	180.00	First sample 06/01/22 - Orange-brown water some brown sediment /8:16 am

Table 1. 2.1 a. Quality of physical water and volume of leachate to date for Espinito Mendoza concession cores.

### CONCLUSIONS.

1. LIGSA through its hydrological monitoring programme is in compliance with the requirements established in accordance with the Law and current technical standards linked to the environmental permits and operational activities of the project.
2. Flows in the area: Runoff at the surface level has experienced substantial increases due to the occurrence of large accumulated rainfall for this quarter (708 mm) generating maximum peaks of 372 lps in the month of April and 28.1 lps in May. At the underground level there is an overall decrease in flow that emerges from the San Lucas tunnel in Ocotillo, going from 24 lps to 32 lps, with a maximum recorded in June of 57.72 lps.
3. The groundwater levels in the same context are presented with variations between 0. 2 to 8 m deep in dry period -recorded in April- the trend is to increase as the rainy season advances.
4. ARD / The first collection of leachate sample corresponding to the accumulated water was carried out in the months of April and May. 8 liters of sample per reactor are preserved (-0°c), for a total of 64 liters of leachate including rainwater.
5. The climate variables show an above normal behavior for the first months of the rainy season, mainly in May where the cumulative amount exceeded 380 mm of precipitation versus the cumulative amount of 22 mm registered in 2021. There is a prospect of a rainy period above normal, the records may exceed the cumulative means of the historical norms for the project area.
6. The technical support of Hydrology area to the inter-institutional technical commission (ANA-FISE-ENACAL-Alcaldías) continues for the formulation of the drinking water project of India and Agua Fría. To date an advance of 75% in the feasibility studies is estimated.

7. Technical support to the operational activities of the La India water purification plant continues.

### **3.2. ENVIRONMENTAL MANAGEMENT**

Condor continues to implement its Environmental and Social Management System, in compliance with internal policies and international standards.

The environmental work was focused on monitoring the level of groundwater and surface water, monitoring climate parameters, water management, waste management and recycling, maintenance of the plants in the "Oro Verde" nursery, and maintenance of 6 reforestation areas located in La India and 2 in Real de la Cruz concessions. Daily 5-minute talks were given to workers on environmental matters, industrial and social safety issues, support was provided to the different areas of the company; Environmental awareness activities were also carried out with workers from the environment and social area, participation in the national reforestation plan, through the donation of plants requested by INAFOR, MARENA, Mayors, MINED and Sandinista Youth, as well as to community members close to the area of influence of the La India mine project, support for the León zoo as part of the Biodiversity program.

Other activities included the preparation and delivery of quarterly environmental reports to government institutions. The company accompanied MEM as part of a complaints procedure against artisanal mining located in Real de la Cruz Concession, which did not have authorization from the property's owner - Condor was summoned to participate (support as owners of the Concession). The first water monitoring was coordinated as part of the Hydrology Baseline; delivery of reports to all competent Institutions (MARENA, MEM , Municipalities and MINSa), a meeting was held with the Santa Rosa del Peñón Municipality on the preparation of the project profile document and PGA to be presented to MARENA; tree cutting activities were carried out in the sector on the way to mestiza as part of the safety to workers, since, due to rains, there were several incidents of falling trees; property fencing activities were carried out and in April 8 forest fires were extinguished.

The "Oro Verde" nursery finished this quarter with a total of 8,888 plants, which are watered, fertilized and kept free of weeds and pests as part of plant maintenance, 250 plants were donated, and 403 new plants were reproduced from the forest species. Activities in the reforestation areas included cleaning, fertilization, irrigation and pest control. A total of 645 trees were used for planting in the reforestation area of the Concession La India and Real de la Cruz, 344 plants were also replaced.

#### **Environmental Management System implementation**

##### **3.2.1.1. Environmental Awareness**

This quarter, 5-minute talks were held during the period from April to June, on safety, environmental and social issues, with the support and coordination of the social area, training was carried out for environmental personnel on planting techniques planting carried out by MEFCa and a diploma course on Technologies to improve agricultural production and productivity began in June, also coordinated by MEFCa with the support of experts on the subject- which lasts 16 weeks- this with the objective to improve the knowledge of workers who carry out reforestation and nursery maintenance activities, guaranteeing a higher percentage of

plant survival. An activity was also carried out at the company's facilities on recycling day; support was provided to MARENA to Earth Day celebration; and Ing. Heidi Vallecillo from the environment area represented Condor Gold at the mining fair as a panelist on the good environmental practices that the company has implemented to achieve the sustainable development of mining.

Other activities related to environmental awareness were the donations to the León Zoo that included food for birds.

Plants were also delivered to INAFOR and Community members in support of the activities of the national reforestation plan and environmental awareness issues led by INAFOR in the communities near the project.

#### **3.2.1.2. Waste management program implementation**

During this quarter, activities related to waste management continued at the La India concession and at the company's facilities

During this quarter, 1,040 pounds of general waste were collected; of which 2,040 lb of organic waste was generated, sent to the municipal dump and glass, paper-cardboard and plastic were stored for recycling with a total of 240 lb, which will be delivered to sites authorized by MARENA. Hazardous solid waste has also been generated (barrels of oil, barrels of hydrocarbons, oily rags, among others), for which removal will be managed with companies authorized by MARENA.

During the daily 5-minute talks, in the Quarter, the information plan continues on topics related to Environmental Management in order to raise awareness among all the Company's workers and prepare them for the next stage that the Mina La India project, where environmental management will be more wide ranging.

#### **3.2.1.3. Soil protection and biodiversity conservation**

As part of the biodiversity remediation and conservation efforts, Condor continues with its tree nursery in La India concession. Likewise, Cónдор continues to implement reforestation plans in 9,272 ha located in Nance Dulce, Soledad de la Cruz and Los Rastrojos in agreement with property owners and in the processing plant sector owned by the company. During this quarter, the reforestation plan included maintenance activities such as irrigation and fertilization, removal of weeds and replacement of lost trees, establishing and expanding a new reforestation area located in the processing plant sector, corresponding to compliance with the environmental authorization of the drinking-water plant issued by MARENA León.

Condor continues with its monthly donations to the Arlen Siu Zoo in León implemented since the fourth quarter of 2019, as part of Condor's commitment to the protection of biodiversity, mentioned in section 3.2.1.1.

In addition, as part of the soil protection program, maintenance was carried out on the different properties of the company, cleaning weeds, cleaning sediments on the road to the processing plant sector and at the entrance of Alfa 6, maintenance of viewpoints, planting of plants on slopes of viewpoints to avoid erosion, cutting of trees on the way to Mestiza in vulnerable areas that threatened the lives of workers or danger to company vehicles.

### **3.2.2. Tree Nursery “Oro Verde”**

The “Oro Verde” nursery provides trees for all the reforestation areas in Condor concessions. At the end of this quarter, a total of 8,888 plants were watered, fertilized and cleaned of weeds and pests as part of the nursery maintenance program.

This quarter we have germinated seeds of oak, basilillo and melina species, generating 403 new plants, which have been monitored and have been given maintenance. In addition, this quarter work continues to be carried out to reduce the pests that affect plants.

Maintenance of oro verde nursery

### **3.2.3. Implementation of reforestation plans and other activities in the concessions**

Activities in the reforestation areas included cleaning, fertilization, irrigation and pest control. A total of 407 trees were used for planting in the reforestation area of La India and Real de la Cruz Concessions.

As part of the reforestation commitment of 200,000 plants - which La India Gold SA agreed in the EIA before MARENA of the mining exploitation project Mina la India, and according to the agreement reached before this Institution- 257 plants have been donated to Institutions such as INAFOR and the Mayor's Office, which are taken into account for such commitment.

#### **3.2.3.1. La India concession**

##### **a. Reforestation activities**

Maintenance continues in the reforestation areas in Nance Dulce, Los Rastrojos and within the company's processing plant sector property. This activity is necessary to ensure the survival of planted trees and it is part of the company's environmental commitments within La India mine environmental permits, for exploration in La India and the environmental authorization for the processing plant sector.

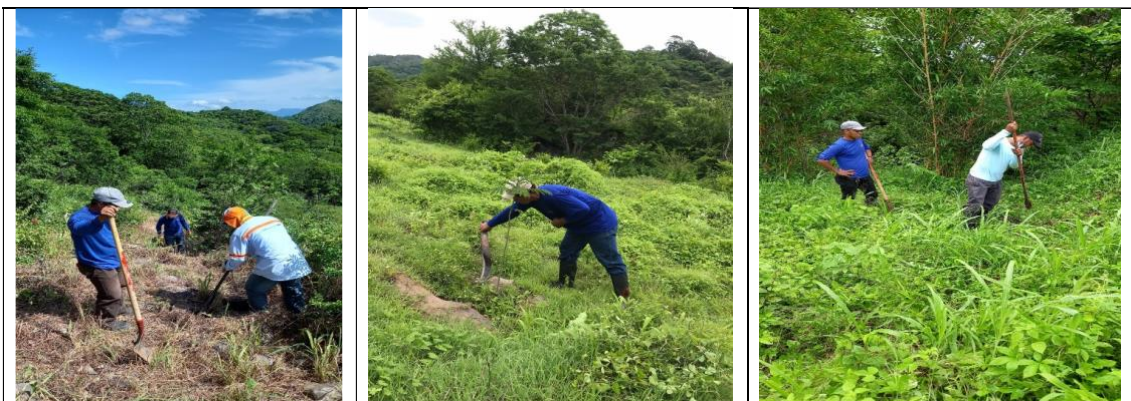

### *Maintenance of reforestation areas in Nance Dulce*

Activities in the reforestation areas included cleaning, fertilization, irrigation, pest control. A total of 645 trees were planted on the properties of Carmen Rios and plant sector, 230 plants were replaced on the properties of Hellen Laguna, Oscar Rios and Carmen Rios.

### **3.2.3.2 Activities in Real de la Cruz concession**

#### **a. Reforestation activities**

Maintenance of the reforested area in Soledad de la Cruz continued. This included irrigation, weeding, fertilization and pest control on trees. A total of 114 trees were replaced.

### **3.3. OTHER ACTIVITIES**

#### **1. Tree cutting in the Concession Espinito mendoza**

Tree cutting was carried out in Tatiana, on the way to Mestiza, for the safety of workers and company vehicles, since due to the heavy rains we had several incidents of fallen trees.

#### **2. Inspection Visit by the Institutions**

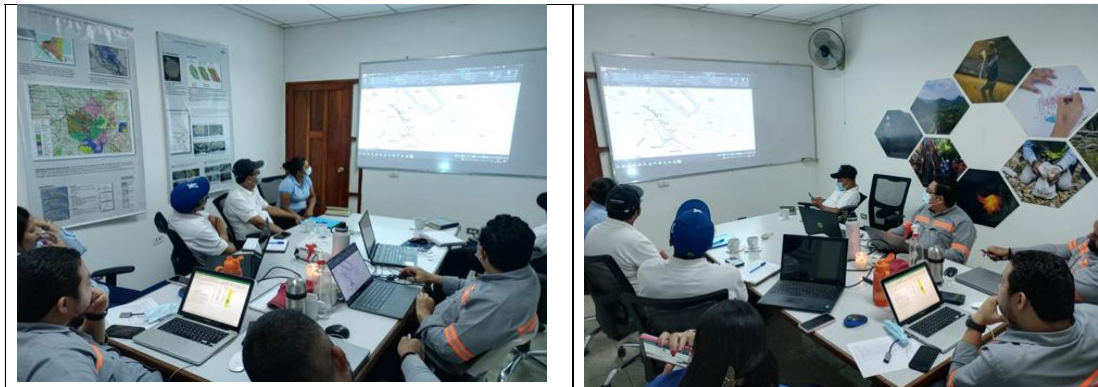

## 2.1 MEM inspection visit

As part of the functions carried out by the Ministry of Energy and Mines, an inspection was carried out due to a complaint filed by Mr. Jeronimo Bonilla, owner of the farm called Real de la Cruz, in which he denounced illegal extraction from artisanal miners who do not have authorization. It should be noted that the company accompanied the inspection as owners of the Concession and having an environmental permit within the area.

### 3. Participation of the environment brigade to put out 8 forest fires and fencing of properties.

### 4. Meeting with Santa Rosa del Peñón Mayor's Office representatives to plan and elaborate a project profile and EIA of the landfill donated to this Institution.

### 5. Representing Condor Gold: Participation of Eng. Heidi Vallecillo, environment area, at the Mining Fair 2022 as panelist on the topic of good environmental practices implemented by the company to achieve sustainable mining development.

## 6. Support activities for other areas of the company

Support activities were carried out for all company's areas: cleaning and burning of weeds in viewpoints and drinking-water plant sector, support for hydrology in piezometers, support to acquisition area in delivering water bottles to El Bordo and Nance communities, maintenance of company properties, removal of sediments on the road to plant sector and Alpha 6 entrance.

Images of the different activities in which support was provided to all areas of the Company

## **1. SOCIAL ACTIVITIES**

### **1.1. STAKEHOLDER ENGAGEMENT IMPLEMENTATION**

#### ***1.1.1. Meetings with local stakeholders***

During this quarter, the company held more than 148 meetings with the leaders of the social programs to coordinate the activities carried out with the members of the programs and the community in general.

Main topics addressed were:

- Water program
- Senior program
- Social contributions
- Business program
- APROSAIC
- Artisanal mining
- Youth in action
- Happy childhood

#### ***1.1.2. Bilateral meetings with local stakeholders***

##### ***Bilateral meetings***

During this period, the company held 148 bilateral meetings, with local organizations in the Area of Direct Influence (ADI) and with NGOs and/or institutions interested in collaborating with social programs.

#### ***1.1.3. Communication campaign***

During this quarter the company disclosed information on the company's contribution to the water problem in La India, on the inauguration of the Los Abuelos medicinal garden, on the training given to the company's forest fire control brigade and on the progress of the community training program.

### **1.2. COMMUNITY RELATIONS PLAN IMPLEMENTATION**

La India Gold developed a social investment plan oriented to generate conditions to promote better community relations in the areas of direct and indirect area of influence of the project;

with a focus on water, communication, support for small mining, among other contributions and programs.

During the quarter, the investment was **US \$ 55,333.53** in the following items:

N°	Area	April	May	June	Total
1	Communication	\$ 3,750.90	\$ 3,965.72	\$ 3,686.89	\$ 11,403.51
2	Water	\$ 2,301.76	\$ 3,160.19	\$ 1,850.29	\$ 7,312.24
3	Artisanal Mining	\$ 2,612.83	\$ 6,230.16	\$ 3,548.36	\$ 12,391.35
4	APROSAIC	\$ 1,602.01	\$ 1,544.76	\$ 1,064.27	\$ 4,211.04
5	Elderly	\$ 1,149.06	\$ 1,388.01	\$ 1,924.00	\$ 4,461.07
6	Small business	\$ 676.20	\$ 650.51	\$ 526.29	\$ 1,853.00
7	Others	\$ 1,744.91	\$ 2,754.67	\$ 6,163.38	\$ 10,662.96
8	Tatiana and America social license	\$ 892.48	\$ 1,678.83	\$ 467.05	\$ 3,038.36
	<b>Total</b>	<b>\$ 14,730.15</b>	<b>\$ 21,372.85</b>	<b>\$ 19,230.53</b>	<b>\$ 55,333.53</b>

**Fresh Water Program in the Santa Cruz of La India community**

The program continues to benefit the population through the Agua Fresca program, which delivers bottles of water for consumption on a weekly basis to the families from Mina la India and Agua Fría.

In 375 households they receive the benefit, which represents 458 families, since 83 multi-household families benefit.

The program benefits 120 households with vulnerable relatives (elderly people, people with disabilities).

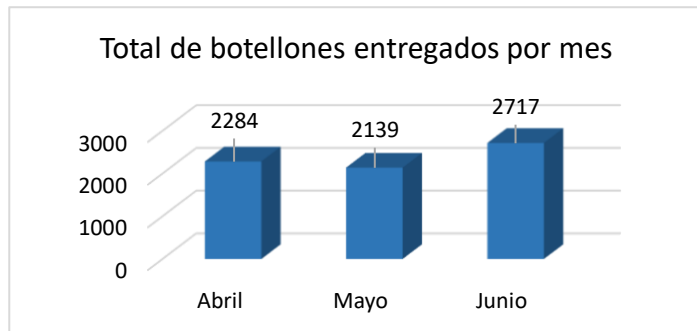

**Activities within the water program:**

- Delivery of two bottles weekly to 458 families.
- Enrollment of 6 beneficiaries in the program.
- 5 institutions received the bottle of water weekly (educational centers, health post, churches).
- As part of the relationship, the program gave details to the mothers benefiting from the program, celebrated on Nicaraguan Mother's Day.

- The beneficiaries received a message about the correct use of water, care and use of bottle and dispenser.
- Relationship visits to beneficiaries of the program.
- During June, the program provided a message to 375 households about health care due to the outbreak of diseases in the winter season.
- Members of the program in Agua Fría participated in a focus group on the care of the vital liquid.

Preventive maintenance to the water treatment plant.

### **Program - Agua es Vida**

During the second quarter of the year, El Agua es Vida program carried out the following actions in favor of the health and well-being of the population of the Mina la India community.

**WATER:** the program has joined actions carried out by the institutions in charge of the drinking water project for the population of Mina la India, visiting all the families of the community to invite them to participate in different assemblies to know the progress of the project, in addition to receiving training given by the New FISE on Law 277 (Special Law of Drinking Water and Sanitation Committees).

**COMMUNITY HEALTH:** the program made a request to MINSA in the first quarter of the year to improve care at La India's health post with the assistance of a permanent doctor to strengthen care, for this second quarter the post already has a permanent doctor and the assistance of one more nurse, an action that has improved care and for which the population's attendance at the health post has increased. These results have been achieved through good relations with the corresponding institutions.

**DENGUE:** Through this program, awareness-raising actions have been carried out to eradicate mosquito breeding sites, the participation of local actors, churches, MINED and residents was requested; natural weeds were cleaned at the health post, house-to-house visits are carried out to invite them to keep their homes clean and the collaboration of people who exercise leadership has been asked to sensitize the residents to join the campaign against dengue.

**RECYCLING:** With the project cleaning and recycling in the community in the second quarter of the year, the program has managed to prevent 358 pounds of plastic bottles from contaminating the community's water sources and streets. In coordination with the Gonzalo García Vallejos educational center, activities were carried out with the aim of promoting the classification of waste in secondary school students.

**Members within the program: 135.**

**Activities carried out quarter April-June 2022.**

<b>Program</b>	<b>Activity</b>	<b>Beneficiaries</b>	<b>Results</b>	<b>Date</b>
Agua es Vida	Collection and sale of waste.	355 households	358 pounds of plastic bottles that are no longer contaminating water sources and streets of Mina la India.	April May June

**Photo Summary:**

Relationship visits to institutions.

Waste classification.

Students from the Gonzalo García school participating in a paper contest with the theme:

Preparation of a small vertical medicinal garden and visits to members who participated in the initiative.

## Business Program

In December 2017, the initiative was born by the company to work with local businesses in the community where the project is located, to prepare them so that they can face the demand when the company becomes one of the largest mines in the country.

Currently the board of directors is made up of 4 members, coordinated by a social technician, with two axes as a horizon: Education and financial training. In which they focus to carry out the activities that are scheduled.

In June, a review was made of the people who are enrolled in the program, but who have never participated in any of its activities, they only wait for staff to visit their home and sometimes they respond poorly. Thus, 55 business owners remain active in the program, with whom they work from 4 areas:

- Bi-monthly training, visits and workshops for the 55 members of the program.
- Community savings; 24 members do so through bank accounts and 14 through piggy banks.
- Santa Cruz de la India Communal Bank, 23 members of the program, which make loans with monthly interest.
- 4 people rent community rooms. They are encouraged to participate in the different activities, according to their commitment to the program, so that they learn and put it into practice new skills in their business.

Below is a summary of the activities of the second quarter of the year with the program:

### Youth in Action Program.

The general objective of the program is to publicize the activities carried out by the members of the program in the 2nd quarter of the year 2022.

During the months of April, May and June, the members of the program carry out activities focused on 2 axes, healthy recreation and young protagonists of change, part of the activities carried out have achieved the involvement of the population that allows joint work, as well as took steps with community institutions to support these activities.

To carry out the different activities, meetings were held in coordination with the mining project, which allowed the constant participation of young people.

For this quarter we had the involvement of parents, in the realization of sports games, community activities and new registrations of 8 young people to the program, in this way we achieved the strengthening of relationships between young people, parents, community and mining project.

AXIS	ACTIVITY	PARTICIPANTS	RESULTS	MONTH
Gestiones	Visits were made to 8 parents, to publicize the youth in action program.	8	Eight young people were enrolled in the program.	April, May & June
	Visits to parents of the young members of the program with the aim of informing about the activities carried out in the 1st quarter of the year.	13	Parents of families recognize the work done by their son/daughters and promised to continue motivating them.	12/05/2022

	A visit was made to a leader of the Barrio Nuevo area to coordinate maintenance of the park and the involvement of the residents.	4	Working together, carrying out activities in a park in the area.	10/06/2022

## Happy Childhood Program.

The Happy Childhood program is a space that Condor Gold has created for the well-being of the children of Santa Cruz de la India, the program will open in November 2019, working with three axes: Healthy recreation, Personal development in values and the relationship with the family and currently has 35 child members between the ages of 09 and 13.

This quarter, the 3 axes of the program were worked on with various recreational, educational and family relationship activities.

In this quarter, 03 celebrations linked to the family and its importance were celebrated on Mother's Day, Children's Day and Father's Day.

During the quarter, 100% of the parents were visited to see if the children were sharing the activities they carried out at home and in some houses to see why the child had not attended the meetings.

Below are the activities carried out:

DATE	ACTIVITIES	Participants	Results
06/04/22	Visit to the medicinal garden and participation in traditional games	21 children, community development and investment manager, members of the medicinal garden .	The medicinal garden was visited and children learned about the species of plants and medicinal products that this place offers. A debate was held on the topic: traditional games vs. digital games, and the children believed that traditional games have more benefits for them and their families than having them installed on their cell phones or tablets. Traditional games were held where all the children participated, who were happy and participative.
03/05/22	Pilgrimage to Cerro la Cruz and participation in recreational activities at the business fair.	20 children, relatives of the children, social team and social actors such as: priest and police.	The child members of the program who are Catholic climbed La Cruz hill to make a pilgrimage and preserve the traditions of the community. The children came to the field to participate in recreational activities of the business fair.
23/05/22	Putting together puzzles and making little boxes in the form of popsicles to give to mothers on their day.	24 children, community investment and development manager .	2 groups were made to assemble 2 puzzles of 100 pieces. A tutorial was shown, materials were handed out and the children were helped to make a little box in the shape of a palette and write a love note for their mothers.
08/06/22	Children's Day celebration with the participation of 04 mothers.	34 children, 04 mothers, information office officer and community development	34 children understood why and how children's day should be celebrated, they enjoyed games and contests. The involvement and participation of 4 mothers who supported the organization and holding of the celebration was achieved.

		and investment manager.	
28/06/22	<p>Meeting with children where the activities took place:</p> <ul style="list-style-type: none"> <li>• Video presentation on the role of parents in the family and its importance.</li> <li>• Debate about the importance of parents in the family.</li> <li>• Alphabet soup game and mazes.</li> <li>• Story presentation: The prince and the poor man. <ul style="list-style-type: none"> <li>• Preparation of paper cards for parents.</li> </ul> </li> </ul>	<p>21 children Community development and investment manager. Information Desk Officer .</p>	<p>21 children gave their opinion about the importance of parents in the family and their development.</p> <p>21 children made cards for their fathers, mothers, grandparents or uncles, the card will be given by them to their parents or person who plays this role of father in their family.</p> <p>21 children carried out recreational activities and saw and understood the message of the story.</p>

## **APROSAIC**

On September 9th, 2017, with the purpose of contributing to the development of the communities, APROSAIC was formed, which serves 6 communities surrounding the mining project, which with the support of CONDOR GOLD-Mina La India and with the collaboration of community leaders, they have executed actions that contribute to the improvement of the quality of life of citizens, focused on four axes: Health, Education, Culture and Community Leadership.

Community relations and work with community leaders are maintained, who are supporting all the actions that are being carried out in the communities.

For this second quarter, the activities promoted the Base Houses, community health and the work of community leaders.

An information survey of 2 communities was also initiated, where a total visit of 95 homes was carried out and the relationship with local actors of each community is also maintained.

Condor Gold continues to work closely with community leaders and supporting community development.

## COPTRAMIN INVOLVEMENT GROUP

Created with the aim of maintaining a constant relationship this program is made up of a board of 5 members of the communities: El Bordo, El Cristalito, Nance Dulce and Talpetate.

The theme of this program this quarter consisted of making house-to-house visits to members of the cooperative who did not attend the scheduled meetings in order to publicize the importance of a program dedicated exclusively to the artisanal mining sector. Likewise, during the meetings with the board of directors, the problem that is currently afflicting the cooperative was identified, such as the large number of foreign artisanal miners, that is, they are not from La India and surrounding communities.

Program	Activity	Beneficiaries	Community	month
Cooperated Miners	House-to-house visit delivering a brochure to members of the cooperative who did not attend the scheduled meetings, with the aim of publicizing the importance of a relationship between the cooperative and the company.	35	El Bordo Nance Dulce El Cristalito Talpetate	April
	Identification of the main problem that affects the cooperative, such as the large number of foreign workers who work and have settled in makeshift homes on the cooperative's land.	156 members	El Bordo Nance Dulce El Cristalito Talpetate	May
	Celebration of the Nicaraguan mother's day with delivery of a present from home to home.	22 mothers	El Bordo Nance Dulce El Cristalito	May
	A meeting was held with the board of directors of COOPTRAMIN in order to discuss with the company the case of artisanal miners outside the cooperative.	156 members	El Bordo Nance Dulce El Cristalito La India	June
	Preparations were made for the miner's day celebration.	156 members	El Bordo Nance Dulce El Cristalito La India	June

**INDEPENDENT ARTISANAL MINERS INVOLVEMENT GROUP**

**Artisanal mining, activities with the board of directors Independent Miners.**

Work continues alongside the independent miners who have the benefit of exploiting ore within the company's property, known as La Mestiza. This is as long as they comply with the regulations and provisions that the company, through its artisanal mining team, enforces on this property.

**Activities with group of independent miners (MESTIZA)**

During the second quarter of 2022, the number of 64 artisanal miners organized in 13 groups benefited from a free access agreement to La Mestiza property based on a contract made to carry out artisanal mining tasks until July 17th, 2022.

Production in the second quarter of the groups benefiting from the access and extraction agreement was 468 tons of ore with an approximate grade of 5.00 gr per ton. Maintaining an average of 156 tons per month, although the rains persisted during May, few groups stopped working and if they did it was momentarily, during this rainy period the artisanal mining team

provided supervision to the mining work, giving its recommendations. and anticipating any accident, performing hazard identification and risk assessment at each job site.

#### **1.4. TATIANA AND AMERICA PROJECT**

In January 2020, the relationship began in the communities of El Tanque, Talpetate, El Capulín and Quebrachal, communities that are of indirect influence of the secondary projects, América and Tatiana, supplementary to the main La India project.

For this year 2022, the axes of work are: Community leadership, Education, Health and community relations.

During the quarter, the main activities were focused on relationships to be able to interact with the families of the communities. Also to be able to observe their current living conditions and maintain a constant relationship with the population so that there is good communication between the company, residents and community leaders.

Educational and health activities were also carried out where residents of the communities participated in order to make them aware of health care and environmental preservation.

As a company, the relationship is being maintained with 115 families that represent a population of 434 inhabitants.

Project Name	Project Description	Total, Individuals Benefited			Month
		Total	F	M	
RELATIONSHIP	Homes in El Capulín, Tanque and Talpetate were visited to collect and update information.	113	113		May
	As part of the Condor Gold Relationship, food packages were delivered to vulnerable people from El Tanque, Talpetate and Capulín.	67	41	26	May
	House to house visits were made to deliver a gift for Mother's Day and to share a motivating message in El Tanque, Talpetate and Capulín.	130	130		May

**1.5. ALLIANCES**

Currently part of the Strategic Alliances are worked through the social area, the approach is maintained with different departmental, municipal and local institutions in order to establish agreements that allow the development and growth of social programs and self-sustaining projects.

As a company, we seek to strengthen the social strategy of each program through the exchange of ideas and joint work between Condor Gold and allied companies.

For the second quarter, work began in partnership with the Ministry of Family, Community, Cooperative and Associative Economy (Mefcca) – León, focused on promoting local businesses in Santa Cruz de la India. Mefcca also provided the opportunity for company employees to receive a virtual Diploma in "Technologies to improve Agricultural Production and Productivity." It was also agreed that courses and training sessions for members of some social programs would be offered in July.

With the Santa Rosa del Peñón's Fire Department it was agreed during July they would provide training in first aid.

The quarter ends maintaining communication with 4 departmental actors and 1 municipal actor.

- Mefcca – Departmental
- Chamber of Commerce – Departmental
- Unite – Departmental
- House of Culture – Departmental
- Firefighters of Nicaragua - Municipal

### 1.6. INFORMATION OFFICE

Condor Gold-Mina La India, in order to maintain the relationship with the population, has at its disposal the Information Office where a registry book is kept, for general visits and for artisanal mining.

This space is also used to hold meetings with the boards of directors of the different programs, meetings, workshops and training sessions, and is the distribution point for one of the two jugs that the Agua Fresca program distributes to the community of Santa Cruz on Wednesdays. from India.

In addition to the issues already dealt with by the information office, from the first quarter of 2022 we will start working on four axes to achieve the objective of the new strategy:

- ✓ Information Office.
- ✓ Mining Education.
- ✓ Recreation with education.
- ✓ Workshops.

Its objective is to create a space with diverse and informative content to share with the population of the communities surrounding the project and other people who visit us.

Here is the detail of visits for the second quarter 2022.

<b>Total visits to Information office</b>
